

Taksh Beladiya

Entry Level Data Engineer — Python • SQL • ETL/ELT • Databricks • Apache Airflow
+1-(737) 396-9685 — takshbeladiya7@gmail.com — linkedin.com/in/taksh-beladiya — github.com/Takshbeladiya

Technical Skills

- **Data Engineering & ETL:** ETL/ELT Pipelines, Data Warehousing, Data Validation, Data Quality Checks, Pipeline Monitoring.
- **Languages & Querying:** Python (pandas, NumPy), SQL, PySpark, T-SQL, MySQL, PostgreSQL.
- **Database Systems & Cloud:** Databricks (Delta Lake), MySQL, MongoDB, PostgreSQL, Microsoft Azure, GCP.
- **Pipeline Automation & Tools:** Apache Airflow, Apache NiFi, Git/Version Control, Docker, REST APIs, Percona XtraBackup.
- **Analytics & Reporting:** Apache Superset, Power BI, Exploratory Data Analysis (EDA), Data Modeling.

Professional Experience

University of Texas System Austin, TX
Graduate Research Assistant Feb 2026 – Present

- Built Databricks ETL pipelines processing 1M+ records with Superset monitoring, improving data reliability by 40%.
- Developed and optimized complex SQL queries and PySpark data transformations to automate data warehouse ingestion.
- Executed data validation and quality checks across multi-source institutional datasets, ensuring high data accuracy.

Blue Data Consulting Surat, India
Associate Data Scientist Dec 2024 – Jul 2025

- Architected NiFi ETL pipelines (50k+ records/day) with Airflow automation and backup recovery, reducing downtime by 40%.
- Extracted, transformed, and loaded 100k+ semi-structured records using SQL and Python, maintaining 99%+ data quality.
- Monitored production data pipelines, investigating data quality issues and applying automated bug fixes.

Blue Data Consulting Surat, India
Data Science Intern Aug 2024 – Nov 2024

- Automated medical email dispatch system using Python and SMTP/TLS, achieving 98% accuracy and driving sales by 30%.
- Built automated data ingestion scripts connecting REST APIs and database tables with Git version control management.
- Performed automated data extraction, cleaning, and validation on unstructured data using Python and SQL.

Omdena Remote
Data Science Intern Aug 2023 – Sep 2023

- Conducted exploratory data analysis and feature engineering in Python to prepare structured datasets for analytics.
- Implemented Power BI dashboards connected to underlying data stores to track pipeline output metrics.

Projects

Automated Data Pipeline with Self-Healing & Recovery — Python, pandas, MySQL, MongoDB, Apache NiFi, Apache Airflow

- Built an end-to-end ETL pipeline (MySQL, pandas, MongoDB) with Apache NiFi self-healing workflows to automate processing.
- Automated pipeline scheduling and monitoring using Apache Airflow with custom alerts, achieving high pipeline uptime.

Multi-Source Institutional Data Integration Pipeline — MySQL, MongoDB, PostgreSQL, Python, SQL, Power BI

- Integrated 50k+ records from MySQL, MongoDB, and PostgreSQL databases into a unified, validated data lake repository.
- Wrote optimized Python scripts and SQL views to perform data quality checks and automated schema normalization.

FusionAI – API & Query Automation Assistant — Python, SQL, REST APIs, Flask, Docker

- Built automated query execution and REST API data extraction workflows, elevating response relevance by 25%.
- Deployed containerized pipeline services using Docker, ensuring reliable data extraction and schema validation.

Education

The University of Texas at Arlington Arlington, TX
Master of Science in Business Analytics — GPA: 4.0/4.0 Expected May 2027

Relevant Coursework: Data Warehousing, Data Mining, Python Programming, Machine Learning, Business Decision Analysis.

Veer Narmad South Gujarat University Surat, India
Bachelor of Computer Applications — GPA: 8.4/10.0 May 2024

Relevant Coursework: Database Management Systems, Software Engineering, Web Development, Statistical Analysis.
