

SESHI REDDY SYAMALA

Senior Data Analyst

seshireddy.sy@gmail.com | (813)317-0856 | www.linkedin.com/in/seshi-s/

SUMMARY

- Results-driven Data Analyst with almost 4 years of experience across healthcare, banking, and enterprise analytics, skilled in deriving actionable insights from large, complex datasets using SQL, Python, Power BI, and Excel.
- Proficient in designing, validating, and optimizing ETL/ELT pipelines using AWS S3, Redshift, Airflow, Databricks, dbt, and Python to streamline data ingestion, transformation, reconciliation, and reporting workflows.
- Experienced in healthcare analytics, including EPIC/EHR extracts, HEDIS measures, ICD-10, CPT, DRG claims validation, patient throughput, utilization reporting, and HIPAA-compliant dashboard development.
- Strong background in financial analytics, including revenue KPI reporting, GAAP-aligned variance analysis, portfolio performance, PII/GDPR-sensitive data handling, control totals, and audit-ready executive reporting.
- Adept at statistical analysis, trend analysis, anomaly detection, regression, classification, clustering, A/B testing, and machine learning concepts using Python libraries such as Pandas, NumPy, scikit-learn, Matplotlib, and Seaborn.
- Strong visualization capabilities using Power BI, Excel, DAX, Power Query, and semantic data models to build dashboards for executive reporting, operational performance, compliance monitoring, and decision-making.
- Hands-on experience with cloud platforms, data warehouses, and databases, including AWS, Snowflake, Amazon Redshift, Big Query, Oracle, MySQL, PostgreSQL, SQL Server, MongoDB, and Databricks.
- Partnered with cross-functional stakeholders across clinical operations, finance, compliance, product, engineering, and leadership teams to translate ambiguous business questions into SQL specifications, KPI definitions, validation routines, UAT criteria, dashboards, and actionable insights aligned with business and regulatory requirements.

SKILLS

Methodologies	SDLC, Agile, Scrum, Kanban, Waterfall, UAT, Requirements Gathering, Data Governance, Data Quality, KPI Frameworks, Data Validation, Documentation
Programming Languages	SQL, Python, R, SAS, MATLAB, STATA
Python Packages	Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, SciPy, stats models
Visualization Tools	Power BI, Tableau, Looker, Excel, Power Query, Power Pivot, DAX, Qlik, QuickSight
Databases	Snowflake, Amazon Redshift, Google Big Query, Oracle, MySQL, PostgreSQL, SQL Server, DB2, MongoDB
Cloud Platforms	AWS S3, EC2, Redshift, Lambda, CloudWatch, Glue, Athena, Bedrock, Azure, GCP, Databricks
ETL / Data Tools	Airflow, dbt, ETL/ELT Pipelines, Power Automate, Power Apps, Git, GitHub, JIRA, Confluence, SharePoint, ServiceNow
Generative AI & Agentic AI	ChatGPT, Claude, Claude Cowork, Claude Agent Skills, OpenAI Tools, Microsoft Copilot, GitHub Copilot, Cursor, Codex, AI IDEs, Prompt Engineering, AI-Assisted Analytics, Agentic AI Concepts, Multi-Tool AI Workflows, LLM-Powered Workflows, Retrieval-Augmented Generation (RAG), AI Workflow Automation, Human-in-the-Loop Review, LLM Evaluation Support, AI-Based Productivity Optimization
Other Technical Skills	Statistical Analysis, Regression, Classification, Clustering, Time-Series Analysis, A/B Testing, Hypothesis Testing, Data Mining, Data Cleaning, Data Wrangling, Data Modeling, Dimensional Modeling, Data Warehousing, Data Marts, Data Lakes, Data Pipelines, Data Storytelling, Fraud/Risk Analysis, Claims Analytics, Revenue Analytics, HIPAA, GDPR, GAAP, PII Handling, Control Totals, KPI Design
Soft Skills	Stakeholder Management, Problem-Solving, Analytical Thinking, Communication, Documentation, Decision-Making, Leadership, Collaboration, Presentation Skills, Attention to Detail

EXPERIENCE

HCA HealthCare

June 2025 – Present

Senior Data Analyst

- Designed HIPAA-compliant Power BI dashboards using EPIC/EHR extracts, SQL models, and healthcare KPI definitions to monitor HEDIS measures, patient throughput, utilization, claims trends, and operational performance.
- Built SQL and Python validation routines for ICD-10, CPT, DRG, claims, patient encounter, and clinical documentation datasets, improving audit readiness and reducing reporting inconsistencies.
- Integrated ETL workflows with Airflow, Databricks, AWS S3, and Redshift to automate healthcare operations reporting and reduce manual Excel-based reconciliation for care teams.
- Optimized complex SQL queries across DB2 and Redshift environments, accelerating KPI refresh cycles and supporting faster staffing, revenue, inpatient, outpatient, and operational decision-making.
- Partnered with clinical operations, finance, compliance, and technology stakeholders to gather requirements, define KPIs, manage UAT, document reporting logic, and deliver governed analytics solutions.

Wells Fargo

May 2024 – April 2025

Data Analyst

- Engineered automated ELT workflows into Amazon Redshift by integrating Oracle, CRM, and S3-based financial datasets to support audit-ready revenue KPIs, portfolio analysis, and executive reporting.
- Configured Power BI semantic models, DAX measures, Tableau reports, and Excel variance analyses aligned with GAAP expectations, improving consistency across finance dashboards and monthly reviews.
- Analyzed banking, customer, transaction, and portfolio datasets to identify revenue trends, risk patterns, outliers, reconciliation gaps, and performance drivers across financial reporting workflows.
- Developed Python and SQL routines to reconcile dashboard outputs with Excel control totals, improving reporting accuracy and reducing rework during monthly and quarterly close cycles.
- Collaborated with finance, risk, compliance, technology, and business stakeholders to translate ambiguous questions into SQL specifications, KPI definitions, UAT criteria, and compliant analytics deliverables.

Capgemini

April 2021 – July 2023

Data Analyst

- Orchestrated Airflow-managed ETL workflows into Databricks by landing CRM, ERP, and operational extracts in AWS S3 for reliable service-performance and enterprise reporting.
- Automated Power BI dashboards using DAX, Power Query, and SQL models, improving operational visibility and reducing manual Excel compilation across reporting workstreams.
- Standardized data governance and data quality checks using Python and SQL routines to validate missing values, duplicates, outliers, data-type mismatches, and KPI inconsistencies.
- Optimized SQL transformations and reconciliations across Snowflake, Oracle, and Redshift, improving refresh stability and enabling timely insights for leadership reviews.
- Coordinated analytics change requests in JIRA and Confluence, translating stakeholder questions into clear requirements, SQL logic, test cases, documentation, and reusable reporting solutions.

EDUCATION

Master of Science in Business Analytics and Information Systems - University of South Florida

CERTIFICATIONS

- Power BI Data Analyst Associate — Microsoft
- Google Data Analytics Professional Certificate — Google
