Summary

Data Analyst with 3 years of experience analyzing financial, healthcare, and operational datasets using SQL, Python, Snowflake, and Power BI. Improved reporting timelines, strengthened data accuracy, identified revenue gaps, and supported business decisions through dashboarding, forecasting, and data validation across cross-functional teams.

Experience

Data Analyst, HyperNexTechnologies, USA

May 2025 – Present

- Extracted and modeled insights from 12M+ transaction records within Snowflake, enabling leadership teams to strengthen quarterly revenue planning accuracy and identify high-variance business trends.
- Streamlined monthly reporting workflows through Python-driven validation and transformation automation, cutting report delivery timelines by 50% while minimizing manual reconciliation effort.
- Designed interactive Power BI reporting suites monitoring revenue performance, churn behavior, acquisition costs, and operational KPIs, supporting strategic reviews across 14 business units.
- Audited and reconciled 50K+ EMR datasets across healthcare systems, elevating reporting accuracy by 25% and improving downstream clinical reporting consistency.
- Detected \$1.2M in recoverable revenue exposure after evaluating billing inconsistencies across three enterprise source platforms and validating transactional mismatches.
- Enhanced Snowflake processing efficiency by 37% through refined join strategies, optimized table architecture, and targeted clustering implementation for high-volume datasets.
- Integrated multi-source operational and financial datasets into centralized reporting tables, reducing manual data preparation effort for analytics teams by 40%.

Data Analyst, Xyphramin Technologies, India

Oct 2020 - Oct 2022

- Engineered automated SQL and Python data pipelines supporting daily reporting refreshes for 8 operational divisions, improving reporting availability and consistency.
- Accelerated dashboard refresh performance by 60% through redesigning transformation workflows and eliminating redundant processing dependencies.
- Modernized executive reporting distribution using automated reporting workflows, saving 11+ manual processing hours weekly and improving report delivery reliability.
- Investigated 2.4M+ historical billing transactions and uncovered pricing gaps impacting mid-market customer segments, contributing to a 6% revenue recovery opportunity.
- Partnered with business stakeholders to gather reporting requirements and deliver standardized KPI reports supporting operational decision-making.
- Combined customer, marketing, and billing data from five systems using SQL to improve reporting consistency across teams.
- Analyzed behavioral and financial risk indicators using regression modeling techniques, increasing credit delinquency prediction accuracy by 12%.
- Measured retention behavior across customer cohorts to identify high-value segments generating 28% stronger lifetime revenue performance.
- Delivered campaign performance analytics that optimized marketing spend allocation efficiency by 22% through detailed ROI trend evaluation and conversion tracking.

Technical Skills

- **Programming Languages:** Python, R, SQL, Scala
- **Data Analysis & Tools:** Pandas, NumPy, SciPy, Dask, PySpark, StatsModels
- **Machine Learning Algorithms:** Linear/Logistic Regression, Decision Trees, Random Forests, Gradient Boosting (XGBoost, LightGBM, CatBoost), SVM, Clustering (K-Means, DBSCAN), A/B Testing, Time Series Forecasting (ARIMA, SARIMA)
- **Deep Learning & Computer Vision:** TensorFlow, Keras, PyTorch, HuggingFace Transformers, OpenCV
- **Natural Language Processing (NLP):** NLTK, SpaCy, BERT, RoBERTa, GPT-3/4, T5, LLaMA, LangChain, Haystack (RAG), NER, Topic Modeling, Sentiment
- **Finance & Risk Modeling:** Credit Risk, Fraud Detection, Monte Carlo Simulation, Portfolio Analysis
- **Retail & E-commerce:** Recommender Systems, Churn Prediction, Demand Forecasting, Market Basket Analysis
- **Data Visualization:** Tableau, Power BI, Looker, Matplotlib, Seaborn, Plotly
- **Database Management:** PostgreSQL, MySQL, MongoDB, Cassandra, BigQuery
- **Cloud Platforms:** AWS (S3, EC2, Lambda, SageMaker), GCP (BigQuery, Vertex AI), Azure (ML Studio, Data Factory)
- **Big Data Technologies:** Apache Spark, Hadoop, Hive, Kafka, Databricks
- **MLOps & Deployment:** Docker, Kubernetes, FastAPI, MLflow, Streamlit, DVC, ONNX, BentoML, GitHub Actions, Airflow
- **Version Control & Project Management:** Git, GitHub, Bitbucket, GitLab, JIRA, Confluence
- **Agile Methodologies:** Scrum, Kanban, SAFe
- **Statistics & Experimentation:** Hypothesis Testing, Bayesian Inference, A/B/n Testing, ANOVA, Chi-Square, T-Tests

Certificates

- [Certificate in Advanced Machine Learning & AI](#)
- [Certificate in Data Analytics & Business Intelligence](#)
- [Oracle Cloud Infrastructure 2025 Certified Data Science Professional](#)

Education

- **Master of Science in Computer Science** Jan 2023 – May 2025
New Jersey Institute of Technology, Newark, NJ, USA
- **Bachelor of Science in Computer Science** Jun 2017 – May 2020
Ashoka Center for Business and Computer Studies, Nasik, India
