

Shravani Chiliveri

Data Analyst

Houston, TX | shravanichiliveri143@gmail.com | (913) 238-8824 | LinkedIn

SUMMARY

Data Analyst with 3+ years of experience transforming complex data into actionable business insights across healthcare and enterprise environments. Expertise in advanced analytics, data modeling, business intelligence, statistical analysis, data governance, and AI-enabled reporting solutions. Proven track record of improving operational efficiency, optimizing reporting processes, and supporting strategic decision-making through scalable data solutions. Skilled in leveraging modern analytics platforms, cloud technologies, and machine learning techniques to drive measurable business outcomes.

TECHNICAL SKILLS

Programming & Analytics: SQL, Python, R, SAS, Excel, VBA, Predictive Analytics, Statistical Modeling, Data Mining

Business Intelligence & Visualization: Power BI, Tableau, Looker, SSRS, Cognos, Domo, Microsoft Fabric, KPI Development, Executive Dashboards

Databases & Data Warehousing: SQL Server, Oracle, PostgreSQL, MySQL, Snowflake, Amazon Redshift, BigQuery, Data Modeling, Dimensional Modeling

Cloud & Big Data Technologies: AWS, Azure, Google Cloud Platform (GCP), Databricks, Apache Spark, Hadoop, Microsoft Fabric

ETL & Data Integration: Alteryx, Informatica, Talend, SSIS, Azure Data Factory, dbt, Data Validation, Data Quality Management

AI & Machine Learning: Machine Learning Fundamentals, Predictive Analytics, Generative AI, AI-Assisted Analytics, NLP, Forecasting Models

Data Governance & Methodologies: Data Governance, Data Stewardship, Data Quality Frameworks, SDLC, Agile, Scrum, Requirements Analysis

Business & Reporting Tools: JIRA, Confluence, Microsoft Office Suite, SharePoint, Visio, Power Automate

EXPERIENCE

Data Analyst | CVS Health

Jul 2025 – Present

- Developed and maintained enterprise reporting solutions that provided actionable insights for healthcare operations and strategic business decision-making.
- Designed interactive Power BI dashboards that reduced manual reporting efforts by 40% and improved visibility for 150+ stakeholders.
- Performed advanced SQL analysis on large healthcare datasets to identify trends, measure performance, and support operational initiatives.
- Partnered with cross-functional stakeholders to deliver scalable analytics solutions and data quality initiatives, improving reporting accuracy and strengthening business decision-making.
- Built forecasting and predictive analytics models that improved planning accuracy by 20% and supported data-driven resource allocation.
- Leveraged Generative AI and AI-powered analytics tools to accelerate insight generation and reduce reporting turnaround time.
- Partnered with data engineering teams to improve data pipelines, reducing data processing delays by 35% and increasing reporting reliability.

Data Analyst | CueTech Systems

Jun 2021 – Jul 2023

- Analyzed large volumes of operational and business data to identify trends and support data-driven decision-making initiatives.
- Developed Power BI and Tableau dashboards that enhanced reporting visibility and improved data accessibility for 100+ business users.
- Created complex SQL queries and automated reporting workflows that reduced report generation time by 45% and increased efficiency.
- Conducted trend analysis and root cause investigations to uncover operational challenges and recommend improvement opportunities.
- Collaborated with business stakeholders to gather requirements and develop scalable data models and reporting frameworks that supported strategic decision-making.
- Improved data quality through validation, reconciliation, and governance processes, reducing reporting discrepancies by 35%.
- Delivered actionable insights and recommendations that contributed to process efficiency improvements of over 20% and faster decision-making.

EDUCATION

Master of Science in Computer Science | University of Central Missouri

Aug 2023 – May 2025
