## Professional Summary

Data Analyst with an M.S. in Computer Science (Data Science Track, GPA 3.97), specializing in data cleaning, statistical analysis, and dashboard design that turn fragmented operational data into business insights and recommendations. Skilled in SQL, Python, Excel, and Tableau across cloud data warehouses, with a track record of lifting reporting reliability by 30%, driving a 15% gain in operational efficiency, and identifying 10–15% in cost-saving opportunities.

## Technical Skills

- Analytics and BI:** SQL, Python, R, Excel, Tableau, KPI Reporting, Dashboard Design, Stakeholder Reporting
- Data Quality and Engineering:** Pandas, NumPy, Data Cleaning, Data Validation, ETL Workflows, dbt Core, Source-to-Report QA, Reconciliation
- Statistics and Modeling:** Regression, Hypothesis Testing, A/B Testing, Feature Engineering, Model Evaluation, Trend Analysis, Variance Analysis, scikit-learn, XGBoost
- Databases and Cloud Data Warehouses:** PostgreSQL, DuckDB, BigQuery, MongoDB, Google Cloud SQL, Git

## Professional Experience

**Sree Nirman** May 2023 – Jun 2024

*Data Analyst*

- Standardized fragmented schemas across a **50K+** record construction portfolio spanning cost, labor, budget, and sales from multiple zones, writing SQL and Pandas cleaning scripts to lift reporting reliability by **30%**.
- Built Tableau dashboards and Tableau Stories tracking project progress against budget, timelines, and zone-level costs, presenting bi-weekly to the CEO and client board members to drive a **15%** gain in operational efficiency.
- Configured a scheduled Tableau Server extract refresh, automating weekly dashboard updates and eliminating manual republishing.
- Engineered **20+** predictive features across **7+** project dimensions, benchmarking Ridge and Lasso regression in Python against a linear baseline to guide board-level bid prioritization, estimating pricing within **10–20%** of held-out results.

**Avanthi High School** Apr 2022 – Jan 2023

*Data Analyst Intern*

- Consolidated **12K+** student financial records and **50K+** expense records scattered across monthly Excel sheets, using Python (Pandas) and SQL to structure them into queryable tables.
- Built Tableau dashboards to analyze the cleaned expense data, identifying **10–15%** in cost-saving opportunities and supporting the institution’s first break-even cycle within four months.
- Trained an XGBoost model on engineered academic features, pairing it with a fine-tuned GPT-2 scorer for admission test answers to replace an inconsistent scholarship-allocation process.
- Validated model-driven scholarship outputs against **1K+** principal-approved records before rollout, driving a **50%** rise in school revenue.
- Designed a two-channel A/B comparison isolating the admission test’s marketing impact, driving an **18%** rise in admissions.

**University of Missouri–Kansas City** Aug 2025 – May 2026

*Information Services Lab Assistant*

- Owned technical support for student-facing computer labs, resolving **75+** tickets per semester across hardware, printer, login, and workstation issues, alongside Python, SQL, R, and notebook-based coding support.
- Drove analytics coaching across **20+** student academic and research projects in Python and R, strengthening EDA rigor, statistical validation, and assumption-checking in peer analysis.

## Projects

**NorthMart: Retail Analytics Pipeline | SQL, dbt Core, BigQuery, Tableau**

- Designed a DuckDB-to-BigQuery pipeline for a simulated 50-store, 5-region retail chain, transforming **15M+** raw transaction line items into analysis-ready fact and dimension tables using dbt Core models with data-quality tests and lineage documentation.
- Published Tableau Public dashboards translating **15M+** transaction records into store- and region-level performance views for stakeholder exploration.

**Market Pulse: Live Job Market Intelligence Dashboard | Python, FastAPI, PostgreSQL, Groq API** GitHub · Live

- Built and deployed a live analytics platform tracking real hiring data across Data Analyst, BI, and Applied AI roles, engineering a daily ingestion and aggregation pipeline from the Adzuna and RemoteOK APIs into a queryable PostgreSQL schema.
- Layered a Groq-powered LLM summary on top of the computed statistics, translating raw hiring trends into a plain-English weekly market report strictly grounded in the underlying data, with no hallucinated figures.

## Education

**University of Missouri–Kansas City** Aug 2024 – May 2026

*Master of Science in Computer Science, Data Science Track*

*GPA: 3.97*

- Relevant Coursework: Database Management Systems, Statistical Learning, Principles of Data Science, Cloud Computing, Generative AI

## Certifications

Salesforce Certified AI Associate
