Memphis, TN | 901-631-0873 | rsruthi645@gmail.com | [linkedin.com/in/sruthi-reddy66](https://www.linkedin.com/in/sruthi-reddy66)

Professional Summary

Data Analyst with 4+ years of experience delivering analytics solutions across healthcare, banking, and business operations domains. Strong expertise in SQL, Python, Power BI, Tableau, Excel, Snowflake, AWS, Azure, and enterprise reporting platforms. Experienced in healthcare claims analytics, HIPAA-compliant reporting, banking customer analytics, ETL automation, forecasting, dashboard development, data governance, and executive reporting. Proven track record of improving reporting efficiency by 25%+, enhancing data quality, and enabling faster business decisions through scalable analytics solutions.

Core Skills

Programming: SQL, Python, R

Visualization and Analysis: Advanced Excel, Power BI, Tableau, Looker, Data Mining, Data Warehousing, Data validation

Databases: Oracle, SQL Server, MySQL, PostgreSQL, Snowflake

Cloud / Big Data: AWS, Azure, GCP, Hadoop, Spark, Kafka, BigQuery, CRM

Engineering: ETL, SSIS, SAS, Informatica, Azure Data Factory, Alteryx, dbt

Advanced Analytics: Forecasting, A/B Testing, NLP, TensorFlow, Scikit-learn, Data Governance, KPI Reporting, HIPAA

Soft Skills: Communication, Teamwork, Stakeholder Management, Problem Solving, Time Management, Adaptability, Attention to Detail

Professional Experience

Coventry Health Care

North Bethesda, MD

Data Analyst (Contract)

Jun 2025 – Present

- Analyzed 500K+ healthcare claims, member, provider, eligibility, and billing records using SQL, Python, Oracle, and Snowflake to identify denials and reporting gaps.
- Built Power BI and Tableau dashboards tracking claims aging, utilization, billing activity, compliance metrics, and service KPIs.
- Automated recurring operational reports using SQL, Excel, Python, and Alteryx, reducing manual effort by 35%.
- Performed reconciliation, validation, and data governance checks across multiple systems, reducing reporting discrepancies by 28%.
- Optimized SQL queries and reporting models, improving dashboard refresh speed by 30%.
- Worked with GCP datasets, Spark, and Hive environments for high-volume claims processing.
- Applied TensorFlow and Python models for claims forecasting and anomaly detection.
- Used Docker and Git for analytics deployment consistency and version control.
- Performed NLP-based text analysis on claims notes and service comments.
- Analyzed revenue cycle, claims adjudication, denial trends, and utilization metrics to improve reporting visibility and operational efficiency.
- Built dashboards tracking member growth, provider quality measures, care operations, and compliance KPIs for leadership teams.
- Supported HIPAA-compliant reporting processes by applying secure data handling, privacy controls, and role-based access for sensitive member and provider data.
- Validated healthcare datasets to ensure compliance with HIPAA guidelines, internal governance policies, and audit reporting requirements.

Project: Healthcare Claims Performance Dashboard

- Built enterprise dashboards integrating Oracle, Snowflake, AWS, and healthcare operational data while maintaining HIPAA-compliant reporting standards.
- Improved visibility into claims backlog, denial reasons, provider productivity, and utilization trends.
- Reduced manual reporting through automated refresh schedules and validation controls.

Environment: SQL, Python, Power BI, Tableau, Excel, Oracle, Snowflake, AWS, GCP, Spark, Hive, TensorFlow, Docker, Git, NLP, Alteryx, ETL, HIPAA, Data Governance

Union Bank

Hyderabad, India

Associate Data Analyst

Jun 2022 – Jul 2023

- Analyzed 1M+ customer accounts, deposits, loans, and transaction records using SQL, Python, and R to identify revenue trends and growth opportunities.

- Built Power BI, Tableau, and Looker dashboards for branch KPIs, revenue movement, customer acquisition, and transaction metrics.
- Automated monthly MIS and finance reports using SQL, Excel, and Power BI, reducing manual effort by 25%.
- Performed A/B testing for campaigns, improving targeting efficiency by 18%.
- Built segmentation models using Python and Scikit-learn to identify high-value customers.
- Reconciled transaction systems with finance data, improving reporting accuracy by 20%.
- Built ETL pipelines using SSIS, Informatica, and Azure Data Factory.
- Supported Kafka feeds, Hadoop, Spark, Hive, and BigQuery environments for enterprise reporting.
- Used NLP models on customer feedback data and Docker containers for ETL deployments.
- Applied TensorFlow models for churn prediction and campaign response forecasting.
- Monitored credit risk, portfolio performance, delinquency trends, and branch profitability metrics to support finance leadership decisions.
- Developed dashboards for customer retention, cross-sell opportunities, treasury liquidity reporting, and account growth analysis.

Project: Customer Revenue & Branch KPI Dashboard

- Developed executive dashboards tracking deposits, revenue, loan growth, customer acquisition, and transactions.
- Automated recurring scorecards and KPI reports for management teams.

Environment: SQL, Python, R, Power BI, Tableau, Looker, Excel, Snowflake, Azure, BigQuery, Kafka, Hadoop, Spark, Hive, TensorFlow, Docker, Git, NLP, SSIS, Informatica

IBeris Software Solutions Junior Data Analyst

Chennai, India
Jan 2020 – May 2022

- Prepared recurring operational reports using SQL, Excel, and Python, improving delivery timelines by 20%.
- Built Power BI and Tableau dashboards tracking sales, inventory movement, and monthly KPIs.
- Performed data cleansing, profiling, transformation, and validation across multi-source datasets, improving reliability by 15%.
- Assisted ETL workflows using SSIS, Informatica, and cloud data sources.
- Supported Hadoop and Spark batch jobs for sales and inventory data processing.
- Used Hive queries for reporting data marts and scheduled extracts.
- Built NLP prototypes to classify support tickets and improve request routing.
- Used Docker environments for testing Python automation scripts.
- Applied TensorFlow models for sales forecasting and demand trend analysis.
- Generated business reports on sales performance, inventory movement, and operational KPIs to support management planning decisions.
- Improved data quality and reporting consistency across multiple business functions through validation and automated controls.

Project: Sales Forecasting & Inventory Dashboard

- Built dashboards tracking stock levels, sales trends, and operational performance.
- Improved inventory planning through forecasting models and automation.

Environment: SQL, Python, Power BI, Tableau, Excel, AWS, GCP, Hadoop, Spark, Hive, TensorFlow, Docker, Git, NLP, SSIS, Informatica

Certifications

- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst Associate
- AWS Certified Cloud Practitioner

Education

Master's in Data Science
University of Memphis, USA

May 2025
