

SUPRITH REDDY AENUGU

AWS Cloud & DevOps Engineer

TX, USA | +1 (940) 843-7392 | suprith@myjobsinbox.com | [Linkedin](#)

PROFESSIONAL SUMMARY

AWS Cloud and DevOps Engineer with 4+ years of experience delivering cloud infrastructure, migrations, container orchestration, Infrastructure as Code (IaC), and CI/CD solutions across enterprise environments. Experienced in AWS services, Kubernetes, Terraform, DevSecOps, and cloud-native application delivery. Proven track record of reducing MTTR by 35%, lowering cloud costs by 22%, and accelerating software releases through modern DevOps practices. Experience supporting AI-powered cloud solutions using Amazon Bedrock, Amazon SageMaker, and OpenAI GPT-4 APIs.

TECHNICAL SKILLS

- Cloud:** AWS (EC2, S3, IAM, VPC, RDS, Lambda, ECS, EKS, CloudWatch, Route 53, ELB, Auto Scaling, SageMaker, Bedrock), Azure (AKS, Azure DevOps), GCP (GCE, GKE, Cloud Run)
- Infrastructure as Code:** Terraform, AWS CloudFormation, AWS CDK, Ansible
- Containers & Orchestration:** Docker, Kubernetes, Amazon ECR, Helm, ArgoCD, Istio
- CI/CD:** Jenkins, GitHub Actions, AWS CodePipeline, AWS CodeBuild, AWS CodeDeploy, GitLab CI, Azure DevOps Pipelines
- Monitoring & Security:** Prometheus, Grafana, ELK Stack, AWS X-Ray, AWS IAM, AWS KMS, AWS Secrets Manager, AWS WAF, Snyk, SonarQube
- Programming:** Python (boto3), Bash/Shell, SQL, YAML, JSON
- Databases:** Amazon RDS, Amazon DynamoDB, Amazon Redshift, MySQL, PostgreSQL
- Methodologies & Tools:** Git, GitHub, GitLab, Agile, Scrum, GitOps, Site Reliability Engineering (SRE), FinOps
- AI:** OpenAI API (GPT-4), LangChain, Prompt Engineering, AIOps
- Operating Systems:** Linux (RHEL, Ubuntu, Amazon Linux 2), Windows Server

PROFESSIONAL EXPERIENCE

AWS Cloud and DevOps Engineer | Verizon | USA

January 2024 – Present

- Supported deployment and maintenance of highly available AWS infrastructure across EC2, EKS, Lambda, RDS, S3, VPC, Route 53, ELB, and Auto Scaling, supporting 20+ enterprise applications with 99.9% availability.
- Integrated Amazon Bedrock foundation models (Claude and Titan) and OpenAI GPT-4 APIs into internal developer portals for AI-assisted code reviews, incident summarization, and automated runbook generation, helping reduce MTTR by 35%.
- Developed AI-assisted infrastructure monitoring with SageMaker and CloudWatch Metrics to identify anomalies and improve incident response through AIOps practices.
- Built CI/CD pipelines with Jenkins, GitHub Actions, AWS CodePipeline, CodeBuild, and CodeDeploy, automating deployments for 15+ microservices through blue/green and canary release strategies.
- Implemented GitOps workflows using ArgoCD and Helm on Amazon EKS, enabling declarative Kubernetes deployments across environments.
- Partnered with Azure and Google Cloud engineering teams to support multi-cloud deployment standards and centralized observability using Azure Monitor, Prometheus, and Grafana.
- Developed reusable Terraform modules covering VPC, IAM, RDS, and EKS provisioning, reducing environment setup time from several days to under two hours.
- Enhanced observability through Prometheus, Grafana, ELK Stack, CloudWatch, and AWS X-Ray while leveraging AI-assisted alert correlation to reduce alert fatigue by 40%.
- Incorporated SAST/DAST scanning using Snyk and SonarQube into CI/CD pipelines, managed secrets through AWS Secrets Manager, and enforced IAM policies aligned with least-privilege principles.
- Optimized cloud spending through AWS Cost Explorer analysis, right-sizing recommendations, and Reserved Instance planning, contributing to approximately 22% monthly cost savings.
- Collaborated with cross-functional teams during Agile sprints, production support, infrastructure automation initiatives, and knowledge-sharing sessions while mentoring junior engineers.

Cloud Engineer | Philips | India

February 2021 – August 2023

- Supported migration of 10+ on-premises applications to AWS using 6R migration strategies (Rehost, Replatform, Refactor), improving scalability and reducing infrastructure maintenance overhead.
- Assessed Azure and Google Cloud Platform services alongside AWS to support hybrid cloud modernization initiatives for healthcare applications.
- Integrated AWS Textract and Amazon Comprehend into healthcare workflows to automate extraction of structured data from unstructured medical documents.
- Provisioned infrastructure using Terraform and AWS CloudFormation, ensuring consistent deployments across development, staging, and production environments.
- Maintained CI/CD pipelines using Jenkins and GitLab CI, reducing manual deployment effort by 60% and improving release frequency from monthly to weekly.
- Packaged Java and Python applications into Docker containers and deployed workloads on EKS with Helm, Horizontal Pod Autoscaler (HPA), and rolling update strategies.
- Configured centralized logging and monitoring using CloudWatch Logs Insights and the ELK Stack, increasing operational visibility and accelerating issue resolution.
- Strengthened network security by configuring VPC segmentation, Security Groups, NACLs, AWS WAF, Route 53, and PrivateLink for secure inter-service communication.
- Refined AWS Lambda functions using Python (boto3) for serverless data processing workflows, reducing processing costs by 30% compared to EC2-based alternatives.
- Collaborated with developers, QA engineers, security teams, and business stakeholders to deliver secure, scalable, and compliant healthcare applications within Agile environments.

CERTIFICATIONS

- [AWS Certified Solutions Architect - Associate](#)
- [AWS Certified Developer - Associate](#)
- AWS Certified DevOps Engineer - Professional | In Progress
- Certified Kubernetes Administrator (CKA) | In Progress

EDUCATION

Master of Science, Computer Science

University of North Texas, Denton, TX

August 2023 – May 2025

Bachelor of Engineering, Computer Science

Malla Reddy Engineering College, Hyderabad, India

July 2018 – June 2022
