

Syed Jafri

Data Analyst | SQL | Python | Power BI | Tableau

Seattle, WA, 98092 | (253)-243-2229 | syedjafri@gmail.com | [LinkedIn](#)

Detail-oriented and results-driven Data Analyst with hands-on experience in data cleaning, reporting, dashboard development, business intelligence, and data visualization. Skilled in using SQL, Python, Excel, Power BI, Tableau, and PySpark to analyze datasets, track KPIs, identify trends, and convert raw data into actionable business insights.

Experienced in building analytics projects across healthcare, music streaming, sales, business intelligence, and real-time data processing. Strong background in business and marketing, with the ability to connect technical analysis with practical business decision-making

TECHNICAL SKILLS

Languages & Technical Skills: SQL, Python (NumPy, Scikit-learn/sklearn), R, MySQL, Hive, TensorFlow, FastAPI, Pandas, Databricks, PostgreSQL, Microsoft Azure, AWS, Large Language Model (LLMs), Agentic AI, Cursor, Claude,

Data & Analytics: PySpark, Data Cleaning, EDA, Regression Analysis, Machine Learning framework (PyTorch) Big Data, Data Mining

BI & Visualization: Power BI, Tableau, Excel, API Development & Visualization, Matplotlib/Seaborn.

Business Analytics: KPI Reporting, Dashboard Development, Predictive Analytics, statistical modelling, Oracle, SAP Data Analyst

EDUCATION

SEATTLE PACIFIC UNIVERSITY

Master of Science in Computer Science (MSCS) - Data Analyst Specialization

Graduation: 05/2026

CGPA: 3.60/4.0

WORK EXPERIENCE

HealthEquity | Data Analyst (Contract via Yam Tech) | Remote

May 2026 – Present

- Extracting data using **SQL Queries** to Retrieves and analyzes data from databases using filtering, aggregation, and sorting.
- Through **JOINS** Combines customer, sales, product, and inventory tables into a unified dataset. With the help of CTEs Breaks complex queries into logical, readable steps.1
- Transforming and cleaning data using SQL and **Python/Pandas**, Cleans messy data, handles missing values, automates repetitive tasks, performs statistical analysis, and prepares datasets. Improving data quality and reduces manual effort.
- Through **Automation** Process Schedules scripts, refreshes reports, and sends alerts automatically. Increases efficiency and reduces operational errors.
- Use **Stored Procedures** to automate daily data extraction, Validate data quality to ensure trustworthy results.
- Designed **Power BI** star-schema data models and created **DAX** measures to track KPIs, increasing executive visibility into sales performance.
- **Power BI Data** Models, Creates relationships between tables and designs efficient star schemas. Enables fast, scalable, and accurate reporting. Building dashboards in Power BI or Tableau.
- Creating meaningful KPIs using **DAX or Tableau** Calculations, Creates calculated fields, LOD expressions, and interactive dashboards. Helps users explore trends and drill into insights.
- Using **PySpark** to process the billions of records efficiently before analysis. It Processes very large datasets distributed across multiple machines. Supports analytics when data is too large for traditional tools.

Altria Group | Data Analyst Intern

January 2026 – April 2026

- Developed efficient SQL Queries extracting the Data and retrieving, Customer information, Sales transactions, Product details and Regional data Analysed sales, business, operational, and performance data to support reporting, KPI tracking, forecasting, and business decision-making.
- Built and maintained reports and dashboards to monitor sales performance, customer trends, operational metrics, and business process efficiency. Build reliable data models in Power BI.
- Developed interactive Power BI dashboards that improved KPI visibility by 35%. Wrote optimized SQL queries to analyze over 2 million records, reducing reporting time by 40%.
- Cleaned, organized, and validated business datasets, improving reporting accuracy. Used Excel, SQL, Power BI, and Tableau to identify trends, track performance, and present actionable insights to stakeholders.
- Meet with stakeholders to understand the problem.
- Prepared recurring reports, ad hoc analysis, and performance summaries, reducing manual reporting time by 25%.
- Identified process gaps and operational bottlenecks through data analysis, supporting efficiency improvements of 20% across reporting workflows.

PROJECTS

Healthcare Operations & Workflow Analytics Dashboard | SQL | Excel | Power BI | Data Cleaning | KPI

Reporting

- Collected, cleaned, and integrated healthcare operational data from multiple sources using SQL and Excel to create a centralized dataset for reporting and analysis
- Wrote complex SQL queries using JOINS, Common Table Expressions (CTEs), aggregate functions, and window functions to extract and transform patient, appointment, provider, and operational workflow data.
- Developed executive-level reports that enabled healthcare administrators to monitor operational performance, resource allocation, service demand, and departmental KPIs.
- Performed data validation, deduplication, and missing value analysis using Python (Pandas), improving data quality and ensuring accurate reporting.
- Designed and developed an optimized Power BI data model using a star schema with fact and dimension tables to support scalable reporting.
- Created DAX measures and calculated columns to monitor key healthcare performance indicators, including patient volume, appointment utilization, provider productivity, wait time, no-show rate, patient turnaround time, and operational efficiency.

Sales Performance & KPI Reporting Dashboard | SQL | Excel | Power BI | Tableau | Data Visualization

- Collected, integrated, and analyzed sales, customer, product, and regional data from multiple sources using SQL and Excel to support sales performance reporting and business intelligence initiatives.
- Developed complex SQL queries using JOINS, Common Table Expressions (CTEs), window functions, and aggregate functions to extract, transform, and validate large sales datasets for analysis.
- Built interactive Power BI dashboards with drill-through functionality, slicers, KPI cards, trend analysis, regional maps, and executive scorecards to provide real-time visibility into sales performance.
- Documented data models, SQL logic, DAX calculations, business rules, and reporting processes to support dashboard maintenance.

CERTIFICATIONS

Google Data Analytics Professional Certificate 2022

Microsoft Office Specialist: Excel Associate (Excel and Excel 2019) — Microsoft, Nov 2025
