Russellville, AR 72801

Seeking 100% remote Software Development work and 10-year contract:

Hi there,

I hope this message finds you well. I am contacting you because there is a job posting online that indicates to me that you need my services and I am attempting to establish a business arrangement with you.

Please take this survey after you read my resume: <https://forms.office.com/r/XGGfZ0Q12M>

I am now accepting clients and will author the software products you need for your I.T. operations from my corporate tornado-proof computer lab in Russellville, AR. I work 100% **remotely**, I don't travel, and I am never on-site save for a few cities in Arkansas.

Please see attached resume and contact me via **E-MAIL** (if you do call then please be ready to use the password – see below) when you are ready to hammer out a memorandum of understanding (MOU) that will lead to a 10-year contract with me for software development services so that we can move forward with your software development project.

Please note, the monthly fee is \$8,000 and I also have an hourly rate of \$40. You just need to tell me how many hours you want me to work on your project per month and I'll do that if you don't have full-time work available. Also, if you want me to work on my hourly rate then we will only use verbal contracts. The MOU and the 10-year contract are for my major clients. Also, my major clients are expected to pay me \$80,000 per year + 3% of gross revenue for 5 years with a \$150 million cap per year as a royalty payment.

Also, if you do not select me for a software development project could you please let me know why I was not selected – I've been searching for many years and have had only two projects so I really need to know why I'm not getting chosen.

Next, I have a Law Enforcement and Nuclear Security work history that I can't talk about – so don't expect much from me in terms of employment history – it is classified and/or confidential.

Finally, I prefer to communicate directly with decision-makers within your organization – like the CEO or president. Also, please don't contact me about non-software development related work/opportunities – I'm only looking for software development projects. Don't forget to take the survey after you read my resume (see above).

Thank you,

Timothy Cary Johnson CEO/Software Author

New Software Author

Agency 17 Operations

Education

2024 – Present Arkansas Tech University

Bachelor of Science in Information Technology: Programming, Database, and Web is in progress and is 51% complete.

Future Training Goals:

Programming in Python [Fall 2025]

Scripting Languages (Python/Django w/ a little Bootstrap/JSON) [Spring 2025]

Completed Training:

Web and Mobile Technologies (HTML5/CSS3) [Fall 2024]

2023 – December 2024 CBT Campus [Online Training] at
[About Us - CBT Campus](#) [The Training Never Stops!]

Future Training Goals:

Developing Microsoft Azure Solutions

Completed Training:

Automating Excel and Access Using VBA
AI-900: Azure AI Fundamentals

2010 - 2024 Microsoft Office 2007 – Microsoft 365 with Windows 10 at Arkansas Tech University
I have finished my custom Computer Science training [Bachelor of Science in Computer Science with a minor in Mathematics is 100% completed - Completed On: 11 May 2024]

Future Training Goals:

[End of ATU training for now.]

Completed Training:

Information Systems Analysis and Design II [Spring 2024]
Information Systems Analysis and Design I [Fall 2023]
OpenCV Bootcamp w/ Python – Computer Vision [OpenCV University] [Fall 2023]
Neural Network Full Course [Simplilearn - [Neural Network - YouTube](#)] [Fall 2023]
College Geometry [Spring 2023]
Information Systems Resource Management [Fall 2022]
Personal Software Engineering (Java/C++) [Spring 2022]
Data Communications and Networks [Fall 2021]
Compiler Design [Spring 2021]
Organization of Programming Languages [Fall 2020]
Introduction to Programming with MATLAB [Summer 2020]
MATLAB Onramp [Summer 2020]
Physical Principles II [Spring 2020]
Advanced Data Structures and Algorithm Design [Fall 2019]
Operating Systems (MINIX) [Spring 2019]
Physical Principles I [Fall 2018]
Introduction to Philosophy [Spring 2018]
Microsoft Visual Basic for Applications [Spring 2018]
Linear Algebra I [Spring 2017]
Database Design and Implementation (SQL) [Fall 2016]
Implications of Technology on Society [Fall 2016]

Thursday, April 17, 2025
