

SUMMARY

Results-driven Data Analyst with 3+ years of experience leveraging data analytics, business intelligence, and reporting solutions to support data-driven decision-making across sales, operations, and education domains. Proficient in SQL, Python, Power BI, Tableau, Advanced Excel, and R, with hands-on experience in data extraction, cleansing, transformation, validation, visualization, and dashboard development. Experienced in building interactive KPI dashboards, optimizing SQL queries, automating reporting workflows, and performing trend, variance, and performance analysis to improve operational efficiency and business outcomes. Strong background in developing executive reports, ensuring data quality and integrity, and collaborating with cross-functional stakeholders to translate business requirements into scalable analytical solutions. Familiar with ETL concepts, relational databases, Salesforce CRM, AWS, Azure, and Agile methodologies, with a proven ability to deliver actionable insights, streamline reporting processes, and support strategic business initiatives in fast-paced, data-driven environments.

TECHNICAL SKILL

Programming & Query Languages: SQL (T-SQL, MySQL), Python, R, C, JavaScript, HTML, CSS

Data Analysis & Business Intelligence: Power BI, Tableau, Microsoft Excel (Advanced Excel, Pivot Tables, Pivot Charts, Power Query, Power Pivot, VLOOKUP/XLOOKUP, INDEX-MATCH, Macros), DAX, Data Visualization, Dashboard Development, KPI Reporting, Scorecards, Ad-hoc Reporting

Database Management: SQL Server, MySQL, PostgreSQL, Relational Databases, Database Design, Data Extraction, Data Validation, Data Cleansing, Data Transformation, ETL Concepts, Stored Procedures, Views, Joins, CTEs, Window Functions

Data Analytics & Statistics: Exploratory Data Analysis (EDA), Statistical Analysis, Trend Analysis, Forecasting, Predictive Analysis, Descriptive Analytics, Root Cause Analysis, Data Mining, Business Performance Analysis, Variance Analysis

Python Libraries: Pandas, NumPy, Matplotlib, OpenPyXL

Cloud & Data Platforms: Microsoft Azure, Azure Data Studio, Amazon Web Services (AWS)

CRM & Business Applications: Salesforce CRM, Geopointe, Microsoft Office 365, Google Sheets

Reporting & Documentation: Business Intelligence Reporting, Executive Dashboards, Management Reporting, Data Storytelling, Report Automation, Documentation, Requirements Gathering

Data Quality & Governance: Data Validation, Data Integrity, Data Quality Assurance, Data Reconciliation, Master Data Management (MDM), Data Governance

Methodologies: Agile, Scrum, SDLC, Waterfall, Business Requirements Analysis, Process Improvement

Version Control & Collaboration: Git, GitHub, Jira, Confluence

WORK EXPERIENCE

Charter Communications | Data Analyst

Mar 2026 - Present

- Designed and developed interactive Power BI dashboards using SQL, DAX, and Power Query to monitor sales performance, revenue trends, customer acquisition, and operational KPIs, enabling leadership to make faster data-driven decisions and improving reporting efficiency by over 30%.
- Wrote and optimized complex SQL queries, stored procedures, and joins to extract, clean, validate, and transform large datasets from multiple data sources, ensuring high data accuracy while significantly reducing report generation time.
- Automated recurring business reports by integrating Power BI, SQL Server, Excel, and Microsoft Office tools, eliminating manual reporting tasks, improving data consistency, and increasing overall productivity across the sales operations team.
- Conducted in-depth trend analysis, variance analysis, and performance forecasting using historical sales and customer data to identify revenue opportunities, operational bottlenecks, and key business drivers that supported strategic planning.
- Collaborated with cross-functional stakeholders including Sales, Finance, Marketing, and Operations to gather reporting requirements, translate business needs into technical solutions, and deliver scalable business intelligence dashboards.
- Performed comprehensive data validation, reconciliation, and quality assurance processes to identify inconsistencies, eliminate duplicate records, and maintain reliable enterprise reporting datasets for executive leadership.
- Presented analytical findings through executive dashboards, visual reports, and business presentations, providing actionable recommendations that improved KPI visibility, operational performance, and overall business decision-making.

North Inc. | Data Analyst

Nov 2025 - Feb 2026

- Extracted, analyzed, and interpreted customer, sales, and operational data from Salesforce CRM using SQL and Excel to identify sales trends, customer behavior, and business opportunities that improved overall pipeline visibility.
- Developed automated Excel dashboards and Salesforce reports using Pivot Tables, Power Query, VLOOKUP/XLOOKUP, and advanced formulas, enabling management to monitor conversion rates, revenue performance, and sales productivity in real time.

- Performed territory and geographic analysis using Geopointe mapping tools to evaluate customer distribution, optimize sales coverage, and identify high-potential markets that contributed to increased customer acquisition.
- Conducted detailed KPI analysis, variance reporting, and performance tracking to measure sales effectiveness, identify operational gaps, and recommend process improvements that enhanced business efficiency.
- Collaborated closely with business stakeholders and sales leadership to gather reporting requirements, validate business metrics, and develop analytical solutions supporting strategic business initiatives.
- Maintained high-quality CRM data by performing routine data validation, cleansing, reconciliation, and integrity checks, ensuring accurate reporting and reliable business intelligence for executive decision-making.
- Produced weekly and monthly business reports with actionable insights, utilizing SQL, Excel, and Salesforce analytics to support forecasting, sales planning, and operational performance reviews.

Sri Aryabhatta Junior College | Data Analyst

Jul 2023 - Nov 2023

- Collected, cleaned, transformed, and analyzed large volumes of academic and administrative data using SQL, Excel, Python, and Power BI, improving reporting accuracy while reducing manual data processing efforts by approximately 30%.
- Developed interactive Power BI dashboards and visual reports to monitor student performance, attendance, academic progress, and institutional KPIs, enabling administrators to make informed decisions through real-time data visualization.
- Wrote optimized SQL queries to extract, validate, and analyze student records from relational databases, ensuring data consistency and improving the accuracy of institutional reporting.
- Conducted statistical and trend analysis to identify key factors affecting student performance, attendance, and retention, providing actionable recommendations that contributed to measurable improvements in academic outcomes.
- Automated recurring reporting processes using Excel Macros, Power Query, and advanced formulas, significantly reducing manual effort while improving report delivery timelines and operational efficiency.
- Worked closely with academic leadership and department heads to gather reporting requirements, translate business needs into analytical solutions, and deliver customized dashboards supporting strategic educational initiatives.
- Performed data quality assessments, validation, and reconciliation to maintain accurate institutional datasets while documenting reporting procedures and supporting continuous improvements in data governance practices.

Data Analyst Intern

Jan 2023 - Jul 2023

- Assisted in collecting, cleaning, validating, and transforming structured datasets using SQL, Excel, Python, and R, ensuring data accuracy and preparing reliable datasets for reporting, visualization, and business analysis.
- Conducted exploratory data analysis (EDA) and statistical analysis to identify trends, correlations, and performance indicators that supported data-driven recommendations for academic and operational improvements.
- Designed Excel-based dashboards utilizing Pivot Tables, Charts, Power Query, and advanced formulas to visualize student performance metrics, attendance patterns, and key institutional KPIs for management reporting.
- Automated manual reporting workflows through Excel Macros and formula-based solutions, reducing repetitive administrative tasks while improving reporting efficiency and consistency across multiple departments.
- Supported senior analysts by developing SQL queries, preparing analytical reports, validating datasets, and creating visualizations that enabled stakeholders to make informed operational decisions.
- Performed comprehensive data quality checks, reconciliation, and documentation to ensure reporting accuracy, maintain data integrity, and support compliance with organizational reporting standards.
- Collaborated with faculty members, administrators, and project teams to understand reporting requirements, present analytical findings, and deliver meaningful insights that contributed to measurable improvements in academic performance and institutional planning.

EDUCATION

Webster University	Jan 2024 - Aug 2025
Master of Science, Information Technology and Management	St. Louis, MO
• Coursework: R, Business Systems Analysis & Design, System & Network Security, Social & Ethical Issues in Analytics, ITM Security	
Malla Reddy Institute of Engineering and Technology	Jul 2019 - Aug 2023
Bachelor of Technology, Electronics and Communication Engineering	Hyderabad, India
• Coursework: Python, C, Probability Theory, Digital System Design, Artificial Intelligence, Digital Image Processing
