

SUMMARY

Data Analyst with 5+ years of experience in analyzing complex datasets to deliver actionable insights and support data-driven decisions. Proficient in SQL, Tableau, Power BI, and Python for building dashboards, automating reports, and identifying key trends. Skilled in end-to-end data workflows, ensuring accuracy, integrity, and compliance. Experienced in statistical analysis, data visualization, and predictive modeling to optimize business processes. Adept at Agile methodologies, cross-functional collaboration, and translating business goals into effective data strategies. Recognized for streamlining pipelines, thorough documentation, and enhancing operational efficiency.

TECHNICAL SKILLS

Data Analysis & Visualization:	SQL, Python (Pandas, NumPy, Matplotlib), Tableau, Power BI, Excel (Advanced)
ETL & Data Handling:	Data Profiling, Data Cleansing, Data Migration, Data Warehousing (Snowflake, Redshift), Hadoop, Spark
Statistical Analysis & ML:	Regression, Hypothesis Testing, Predictive Modeling
Reporting & BI Tools:	Tableau Dashboards, Tableau Server, Report Automation, Data Validation
Project Management & Collaboration:	Agile (Scrum), JIRA, Confluence, MS Visio, BRDs, FRDs
Compliance & Testing:	Functional Testing, UAT, Data Quality Testing, HIPAA, GDPR
Programming & Scripting:	SQL (Advanced), Python, Stored Procedures, Packages
Data Integration & Documentation:	Data Mapping, Data Lineage, Metadata Management, Use Case Development

WORK EXPERIENCE

Elevance Health, GA	May 2024 to Present
Data Analyst	
Responsibilities:	
• Collaborated with cross-functional teams to design and deliver data-driven solutions that improved platform performance and supported strategic decision-making. • Analyzed complex datasets and built executive-level dashboards and reports using Tableau and Python, delivering actionable insights and performance metrics. • Integrated and managed data from multiple sources (Snowflake, AWS, OneLake), performing data cleansing and optimization of stored procedures for consistent reporting. • Developed automated data pipelines and intent-driven extraction processes to prepare datasets for analytics and outbound communications. • Utilized AWS services (S3) and Databricks to handle large-scale data operations, ad hoc requests, and maintain robust analytics workflows. • Monitored data quality by creating scripts and dashboards to track anomalies, verify integrity, and ensure reliability in reporting layers. • Led documentation and stakeholder engagement by automating templates, gathering feedback through weekly change request meetings, and translating user stories into scalable solutions. • Managed project delivery using Jira and Confluence, overseeing sprints, releases, KPIs, and retrospectives to ensure timely and efficient development.	
Environment: AWS (S3, Glue), Snowflake, Databricks, Python, Tableau, SQL, Stored Procedures, OneLake, JIRA, Confluence, Git, Agile/Scrum, Linux, Excel, Shell Scripting, Data Pipelines, Dashboarding Tools, ETL Tools, Data Governance Tools	

CAT, HYD**Sep 2022 to Aug 2023****Data Analyst****Responsibilities:**

- Acted as SME for Caterpillar's enterprise data platforms, gathering business/data requirements and aligning them with digital platform needs.
- Documented ETL functional specs and data flow diagrams, coordinating with ETL teams to ensure accurate data integration into the Loan Quality Ecosystem.
- Worked on SAP data extraction and integration projects involving SAP HANA and SAP BW systems to streamline financial and operational reporting.
- Created data mappings between SAP tables (FI/CO modules) and enterprise data warehouse to support analytics across financial systems.
- Collaborated on integrating financial data from MB Financials and defined data mappings, technical docs, and API specifications for Lending Message Bus services.
- Partnered with ETL and QA teams to identify pipeline issues, support data validations, and prioritize defect resolution based on business impact. Authored user stories in JIRA, performed UAT/integration testing, and visualized workflows using Visio and UML to support development and testing processes.
- **Environment:** SQL, Stored Procedures, Tableau, SSRS, ETL Tools (Informatica/Talend/Custom), JIRA, Visio, UML, Data Flow Diagrams, Data Governance Frameworks, API Integration, Loan Origination Systems, Agile/Scrum, Cloud-based Reporting Platform

NewGen Software, HYD**July 2020 to August 2022****Data Analyst****Responsibilities:**

- Collaborated with end users to understand business data needs and core information concepts to drive effective data solutions.
- Designed conceptual and logical data models using Erwin and generated schemas/DDL through forward and reverse engineering.
- Conducted data analysis to identify source datasets, metadata, definitions, and formats for integration and processing.
- Prepared ETL mapping documents and test cases to support development, data migration, and SDLC compliance.
- Performed data profiling, cleansing, and transformation using Python (Pandas, NumPy) and assisted ETL developers in validating data accuracy.
- Wrote advanced SQL queries for data extraction, analysis, and reporting, leveraging joins and conditions based on business logic.
- Built and validated Tableau dashboards and scorecards, implementing static/dynamic data checks and row-level security using user filters.
- Created hierarchies, heat maps, and interactive reports in Tableau; published to Tableau Server with live connections and scheduling extracts.
- Used data blending in Tableau to integrate data from various sources like Oracle and MS SQL Server, ensuring comprehensive insights.

Environment: Erwin Data Modeler, SQL, Oracle, MS SQL Server, Python (Pandas, NumPy, Matplotlib), Tableau Desktop, Tableau Server, Data Profiling Tools, ETL Tools (Informatica/Talend), SDLC, Data Mapping, Data Cleansing, Data Migration, Data Analysis, Data Blending, DDL, Data Validation, Agile Methodology

EDUCATION

University of Central Missouri *Masters of science in Computer Science*

DRK Institute of Science and Technology *BS in Computer Science and Engineering*
