

SUMMARY

Healthcare Data Analyst with **3+ years of experience** in healthcare analytics, clinical reporting, and healthcare data management at UCLA Health. Proficient in SQL, Python (Pandas, NumPy), Microsoft Excel, Power BI, Tableau, Epic EHR, ETL, and data visualization. Experienced in healthcare data analysis, population health analytics, KPI reporting, data quality, data governance, HIPAA compliance, regulatory reporting, dashboard development, and delivering data-driven insights to improve clinical operations, reporting accuracy, and healthcare decision-making.

TECHNICAL SKILLS

Healthcare Analytics: Healthcare Data Analysis, Clinical Reporting, Population Health Analytics, Quality Metrics, Patient Data Analysis

Data Analysis: SQL, Python (Pandas, NumPy), Microsoft Excel, Data Cleaning, Data Validation, Data Analysis

Business Intelligence: Power BI, Tableau, Dashboard Development, KPI Reporting, Data Visualization

Healthcare Systems: Epic EHR, Electronic Health Records (EHR), Healthcare Data Management, Clinical Data

Databases: SQL Server, Relational Databases, Data Extraction, ETL

Data Management: Data Quality, Data Governance, Data Integrity, Data Documentation

Compliance: HIPAA Compliance, Healthcare Data Privacy, Regulatory Reporting

Tools: Power Query, Jupyter Notebook, Git, Microsoft Office

Business Skills: Requirements Gathering, Stakeholder Collaboration, Process Improvement, Reporting & Analytics

PROFESSIONAL EXPERIENCE

UCLA Health, CA, USA	Sep 2024 - Current
Healthcare Data Analyst	
- Analyzed clinical and operational datasets supporting 18 departments, improving reporting accuracy 29% through SQL-based validation and reconciliation. - Built 14 Power BI dashboards tracking patient outcomes, quality measures, and operational performance for executive and clinical leadership. - Automated recurring SQL and Excel reporting workflows, reducing manual reporting effort 36% while improving monthly reporting consistency. - Validated 650K+ Epic EHR records, increasing clinical data accuracy 23% by resolving documentation and coding inconsistencies. - Partnered with physicians, nursing teams, and operational leaders to define reporting requirements supporting 12 healthcare service lines. - Optimized SQL queries for population health reporting, reducing dashboard refresh times 41% across enterprise reporting environments. - Conducted healthcare data quality audits achieving 99% HIPAA compliance across regulatory submissions and internal governance standards. - Developed 12 Tableau dashboards monitoring readmission trends, patient throughput, and quality indicators, enabling 22% faster operational decision-making across 15+ clinical departments. - Verified ETL data loads across multiple healthcare sources, decreasing validation exceptions 31% through structured testing and reconciliation. - Prepared reporting documentation, business definitions, and validation procedures, improving analytics consistency across 15 cross-functional healthcare teams.	

UCLA Health, CA, USA	Aug 2023 - Sep 2024
Junior Healthcare Data Analyst	
- Extracted healthcare data using SQL, supporting daily reporting for 10 clinical departments with improved reporting accuracy 24%. - Cleaned and validated 450K+ patient records, reducing duplicate and incomplete healthcare records by 20% across reporting systems. - Assisted developing Power BI dashboards displaying patient volumes, appointment utilization, and operational performance for departmental managers. - Supported Epic EHR data validation activities, improving documentation quality and reducing reporting discrepancies during monthly compliance reviews. - Generated recurring Excel and SQL reports, decreasing manual preparation time 30% through standardized reporting templates. - Collaborated with analysts and clinicians to validate healthcare reporting requirements across 15+ departments, improving reporting accuracy by 24% for quality improvement initiatives. - Performed data quality assessments identifying reporting inconsistencies, increasing dataset reliability 21% before enterprise dashboard publication. - Assisted validating ETL processes for healthcare datasets, reducing loading errors 27% through structured testing and issue resolution. - Maintained reporting documentation and data dictionaries, improving knowledge transfer across analytics teams and newly assigned reporting projects. - Monitored KPI performance trends using Tableau, supporting leadership with timely operational insights for clinical service improvements.	

EDUCATION

Bachelor of Science in Statistics, Concentration in Data Science	Aug 2022 - May 2026
California State University, East Bay, CA, USA	

PROJECTS

Clinical Performance & Population Health Dashboard	
- Developed Power BI dashboards analyzing patient outcomes, quality metrics, and operational KPIs using SQL, Epic EHR, and healthcare datasets. - Integrated clinical, operational, and population health data, improving reporting accuracy through validation, reconciliation, and standardized business definitions. - Delivered interactive visualizations enabling healthcare leadership to monitor readmissions, patient throughput, utilization trends, and quality improvement initiatives.	
Healthcare Data Quality & Regulatory Reporting Automation	
- Automated SQL and Excel reporting workflows, streamlining regulatory reporting processes while reducing manual effort through standardized ETL validation procedures. - Implemented healthcare data quality checks across Epic EHR datasets, improving data integrity, documentation accuracy, and HIPAA-compliant reporting consistency. - Created comprehensive validation documentation, data dictionaries, and reporting standards supporting cross-functional analytics teams and enterprise healthcare governance initiatives.
