EDUCATION

Seattle University, Seattle, WA Sept 2023 – June 2025
B.A. Business Analytics, Minor in Economics — Cum Laude

Green River College, Auburn, WA Sept 2021 – June 2023
A.A. Business Management — High Honors, Phi Theta Kappa

WORK EXPERIENCE

AP Analytics Sole Proprietorship, Auburn, WA Aug 2025 – Present
Freelance Data Analyst

- Built Tableau and Excel dashboards for **3–5** concurrent clients across **5+** industries within **48–72** hour turnarounds by translating raw datasets into KPI tracking across sales, operations, and marketing, enabling faster performance evaluation and more consistent reporting decisions.
- Strengthened data reliability for client reporting by collecting, validating, and organizing datasets into clean, reporting-ready structures using **SQL and Python**, identifying inconsistencies and reducing downstream reporting errors.
- Surfaced pricing and campaign performance drivers by conducting segmented analysis on multi-source data using **Python and Excel**, enabling data-backed adjustments to operations and spend strategy.

Seattle University, Seattle, WA Mar 2024 – Dec 2024
Student Engagement Associate (Orientation Data & Operations)

- Elevated program targeting and data quality by analyzing **1,000+ student records** to identify inconsistencies and operational trends, supporting more effective decision-making.
- Reduced reporting turnaround time by **30%** by building standardized **Excel workflows and dashboards**, increasing consistency across **5+ departments**.
- Shaped orientation program updates by analyzing **200+ survey responses** to diagnose engagement gaps, producing findings that directly drove changes to student experience design.

Green River College, Auburn, WA Aug 2022 – June 2023
Event Operations Specialist

- Cut event costs by **10%** and planning time by **25%** by building Excel models to track and analyze resource allocation data across **10+** events (**\$1K–\$8K** range), exposing inefficiencies in spend and utilization.
- Boosted planning accuracy across **3+** departments by building structured **Excel** intake and tracking systems to capture and organize stakeholder requirements, reducing misalignment in event execution by **15%**.
- Eliminated **20%** of last-minute operational failures by designing standardized Excel tracking systems to monitor vendor, staffing, and logistics KPIs, ensuring consistent on-time, on-budget delivery across events.

PROJECTS

Alaska Air Group: Financial Margin Analysis, Excel, Power Query June 2026

- Uncovered a widening profitability gap, with revenue growing **6.7x** faster than net income over **36** years, by building a longitudinal model from the company's public financial filings.
- Traced **5** structural drivers of margin compression — including debt coverage falling to **1.6x** and interest costs consuming **42%** of operating income — through close analysis of balance sheet and income statement data.

CRM Sales Pipeline Optimization, SQL, Tableau, Excel May 2026

- Pinpointed stage-by-stage conversion drop-offs and a **3.4x** performance gap across sales reps by querying **8,800+** CRM deal records with SQL, surfacing process inefficiencies to support operational efficiency initiatives.
- Built an executive-facing Tableau dashboard tracking **10+** pipeline KPIs across deal stages, enabling leadership to monitor conversion performance and identify process gaps in real time.

Customer Churn Prediction & Retention Strategy, Python, Tableau Jan 2026

- Isolated the demographic, geographic, and behavioral factors most predictive of customer churn by analyzing patterns across the full customer dataset, surfacing actionable risk indicators for retention targeting.
- Generated predictive retention insights at **86.7%** accuracy by training a Python-based classification model on behavioral and demographic data, producing a ranked risk report to support targeted business action.

SKILLS AND CERTIFICATIONS

- Data Tools:** SQL, Python, R, Tableau, Excel (Power Query, Pivot Tables, Dashboards, VLOOKUP)
- Analysis & Insights:** Trend Analysis, Driver Analysis, Predictive Modeling, Process Optimization
- Data Techniques:** Data Cleaning, Exploratory Data Analysis, KPI Development, Dashboarding
- Certifications:** Microsoft Introduction to Generative AI for Data Analysis, Microsoft SQL Foundations
