

ARYAN BUSI

(928) 310-5812 | aryan31re@gmail.com | United States

PROFESSIONAL SUMMARY

- **Data Analyst with 5 years analyzing large datasets to identify trends, patterns, and actionable business insights.** I translate raw data into clear, decision-ready outputs that drive business action across multiple organizations and industries.
- **I build and maintain dashboards and reports in Power BI and Tableau that give business teams the visibility they need.** I write SQL queries to extract, manipulate, and explore data across databases. I automate recurring reporting processes, eliminating manual effort and ensuring consistency.
- **I focus on data quality — validating data before it reaches reports and catching issues before they impact decisions.** I collaborate with cross-functional teams to understand their questions, then deliver analysis that answers those questions clearly.
- **I present findings to stakeholders in ways they can act on — not just numbers, but context and recommendations.** I perform ad hoc analysis to support one-off business decisions. I use Python and R for statistical analysis, and I have cloud platform and ETL experience.

WORK EXPERIENCE

Mu Sigma | United States

Jun 2025 – Dec 2025

Data Analyst

- Analyzed **large datasets across regional systems to identify trends, patterns, and business insights** supporting supply chain operations. Explored data to surface opportunities for improvement and process optimization.
- Built and maintained **Power BI and Tableau dashboards and reports** that gave operations leadership visibility into forecast accuracy, inventory levels, and regional demand. Dashboards updated automatically and served as the primary tool for business decision-making.
- Wrote **SQL queries for data extraction and manipulation** across regional databases. Pulled complex datasets, performed joins and aggregations, and prepared data for analysis and reporting.
- Collaborated with cross-functional teams to understand their data questions and **presented analysis findings to stakeholders** in ways they could act on immediately. Translated findings into business context and recommendations.
- Automated recurring reports using Python (Pandas, NumPy, Matplotlib), eliminating 6+ hours of manual work per week. Ensured **data quality by validating data** before it reached reports and catching issues before they impacted business decisions.

Technologies Used: SQL, Python (Pandas, NumPy, Matplotlib), Power BI, Tableau, Excel, AWS, Google Cloud

Fractal Analytics | United States

Jan 2025 – May 2025

Data Analyst

- Analyzed **large customer datasets** to identify retention patterns, churn drivers, and growth opportunities. Surfaced trends that informed business strategy and customer targeting decisions.
- Built and owned **Power BI dashboards tracking customer metrics** including lifetime value, retention cohorts, and campaign performance. Dashboards enabled real-time business visibility and decision-making.
- Wrote **SQL to extract and manipulate data** across four integrated systems. Performed complex joins, aggregations, and transformations to support analysis and reporting needs.
- Collaborated with marketing and operations teams to understand their questions, performed ad hoc analysis, and **presented findings to stakeholders** with clear business context and recommendations for action.
- Automated campaign performance reporting and customer metric aggregation using Python, reducing manual reporting time significantly. Maintained **data quality through systematic validation** and caught data inconsistencies before they affected analysis.

Technologies Used: SQL, Python (Pandas, NumPy, Matplotlib, Scikit-learn), Power BI, Tableau, Excel, Azure, ETL concepts

Tericsoft | India

Jun 2021 – Mar 2024

Data Analyst

- Analyzed **financial and operational datasets** to identify trends in revenue, margin, efficiency, and cost drivers. Presented findings to leadership supporting strategic and operational decisions. Relocated to the US in 2024 for an M.S. in Business Analytics at Northern Arizona University.
- Built and maintained **Power BI and Tableau dashboards** tracking 8 financial and operational KPIs. Dashboards provided real-time visibility to leadership on performance against targets and enabled rapid decision-making.
- Wrote **SQL queries to extract, transform, and analyze** financial and operational data across three connected databases. Performed complex joins, window functions, and aggregations to support reporting and analysis.
- Performed ad hoc analysis to support business decisions, collaborated with finance and operations teams, and **presented analysis to stakeholders** in business-ready language with clear recommendations.

- Automated recurring financial and operational reports using Python (Pandas, NumPy, R for statistical analysis), reducing manual effort from 6 hours weekly to 25 minutes. Ensured **data quality through validation and error checking** before data reached production reporting and maintained zero errors across 4 consecutive quarters.

Technologies Used: SQL, Python (Pandas, NumPy, Matplotlib, Scikit-learn), R (statistical analysis, ARIMA forecasting), Power BI, Tableau, Excel, AWS, Google Cloud, ETL/data warehousing concepts

TECHNICAL SKILLS

- **Data Analysis & Querying:** SQL (data extraction, manipulation, complex queries, joins, aggregations, window functions), Python (Pandas, NumPy, Matplotlib, Scikit-learn), R (statistical analysis, ARIMA forecasting, classification modeling)
- **Dashboards & Reporting:** Power BI (dashboard development, DAX, data modeling), Tableau (dashboard design, reporting), Advanced Excel (PivotTables, Power Query, financial modeling), Automated reporting
- **Data Quality & Validation:** Data validation and quality checks, Error identification and resolution, ETL and data warehousing concepts, Systematic data profiling
- **Cloud & Infrastructure:** AWS (data analysis support), Azure (cloud platforms), Google Cloud (data analysis), Cloud data platforms
- **Business Analysis:** Trend and pattern identification, Cross-functional collaboration, Stakeholder communication and presentation, Ad hoc analysis, Business insight generation, KPI development

EDUCATION

Master of Science in Business Analytics — Northern Arizona University, Flagstaff, AZ
