

BALACHANDAR PINNINTI

Data Analyst | SQL · Python · Power BI · AWS Analytics · ETL & Dashboarding
Balachandarsaip@gmail.com | +1 (678) 517-3376 | [LinkedIn](#) | US Citizen

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn, Statsmodels), SQL, R
Databases: MySQL, PostgreSQL, Snowflake, BigQuery, MS SQL Server, MongoDB, Oracle
Visualization: Power BI, Tableau, Looker Studio, Matplotlib, Seaborn, AWS QuickSight
Cloud & Big Data: AWS (S3, Glue, Lambda, Athena, Redshift), Azure (Data Factory, Synapse), GCP (BigQuery)
Analytics & ML: ETL/ELT, Data Wrangling, Data Cleaning, Statistical Analysis, Regression, Classification, Forecasting, A/B Testing, Feature Engineering, TensorFlow, Keras
Tools: Git, Jupyter Notebook, Excel, API Integration, Alteryx, Talend, SPSS, Flask

EXPERIENCE

- Graduate Teaching & Research Assistant** | [Kennesaw State University](#) | Marietta, GA Aug 2024 – Dec 2025
- Built a Security-Aware RAG system for post-quantum cybersecurity intelligence using FAISS, sentence-transformer embeddings, and HuggingFace LLMs; implemented prompt injection detection (100% detection rate) and trust-weighted retrieval to reduce hallucinations, achieving a mean confidence score of 0.71 across NIST-based queries
 - Designed a hybrid quantum-classical AI system for early disease detection by fusing medical imaging (ResNet), clinical text (BioBERT), and genomic data (CNN+VAE) with a 4-qubit variational quantum circuit; achieved 96.7% recall, 86.7% accuracy, and 0.964 ROC-AUC on real healthcare datasets
- Data Science Intern** | [Dataminds Analytics](#) | Hyderabad, India Jan 2024 – May 2024
- Diagnosed forecast inaccuracies in demand planning models; rebuilt ML pipelines (Scikit-learn, TensorFlow) on 500K+ records, improving forecast accuracy by 18% and reducing overstock risk for the business
 - Resolved data quality issues across 10+ raw data sources using multi-stage EDA and cleaning in Pandas/NumPy, cutting error rates by 35% and reducing manual prep time by 40% via automated ETL pipelines
 - Built 3 Power BI and Tableau KPI dashboards — adopted daily by cross-functional stakeholders to track sales, ops, and marketing performance, replacing ad-hoc spreadsheet reporting
- Web Development Intern** | [BrainOvision Solutions Pvt. Ltd.](#) | Hyderabad, India Oct 2021 – Dec 2021
- Resolved slow application response times by optimizing MySQL queries and indexing relational schemas, improving data retrieval speed by 25% and eliminating user-facing timeouts
 - Solved fragmented data flow between internal systems by building Python/Flask pipelines to ingest, validate, and transform third-party API data, enabling reliable structured reporting for ops teams

PROJECTS

- Customer Churn & Revenue Analytics Dashboard** | *Python, SQL, Pandas, PostgreSQL, Scikit-learn, Power BI, Git*
- Cleaned and modeled 2M+ rows of transactional data in PostgreSQL; engineered 15+ RFM and behavioral features via SQL CTEs and Pandas to predict churn with 80%+ precision
 - Delivered a Power BI KPI dashboard (churn rate, LTV, retention cohorts) that enabled the retention team to prioritize outreach, projecting a 12% reduction in customer churn
- YouTube Video Engagement Analytics Pipeline** | *AWS S3, Glue, Lambda, Athena, QuickSight, Python*
- Architected serverless ETL pipeline (S3 → Glue → Athena) processing 1M+ daily trending video records at 99.9% uptime; built QuickSight dashboards across 50+ regions, cutting ad-hoc reporting by 30%
- Healthcare Claims Data Quality & Anomaly Detection** | *Python, SQL, Pandas, NumPy, Power BI*
- Developed IQR and z-score anomaly detection on 500K+ daily healthcare claims, achieving 99% data accuracy; automated validation workflows reduced QA cycle time from 3 days to 4 hours

EDUCATION & CREDENTIALS

- M.S. Information Technology** — [Kennesaw State University](#), Marietta, GA Aug 2024 – Dec 2025
B.Tech Electronics & Communication Engineering — [Sreenidhi Institute of Science & Technology](#), India Aug 2019 – Jun 2023
Certifications: Cisco Data Analytics Essentials | Palo Alto Networks: Fundamentals of Cloud Security
Publication: Garbage Classification using Deep Learning — IEEE Journal, May 2023
