## Summary

Marketing Growth & Product Analytics Professional with 4+ years of experience in marketing analytics, data analytics, and business intelligence, specializing in transforming complex datasets into actionable insights for growth optimization, customer segmentation, forecasting, and performance measurement. Proficient in Python, SQL, and BI tools, with expertise in experimentation, attribution modeling, predictive analytics, and dashboard development to support cross-functional, data-driven decision-making across marketing and product environments at a global scale.

## Technical Skills

- Data Analysis & Visualization:** Python, R, SQL, Excel (Pivot Tables, Advanced Modeling, Macros), Tableau, Power BI, Power Query, DAX, Looker, Google Analytics 4 (GA4), Confluence, SharePoint
- Marketing Analytics & Optimization:** A/B Testing, Multivariate Testing, Bayesian Testing, Cohort Analysis, Regression Analysis, Trend Analysis, Multi-Touch Attribution, ROI & Customer Lifetime Value (CLV) Modeling, HubSpot, Google Tag Manager (GTM)
- Customer & Market Insights:** Customer Segmentation, SKU Performance Analysis, Loyalty Program Analytics, Purchase Behavior Analysis, Basket Analysis, Regional Sales Insights, Cross-Sell & Upsell Strategies, Decision Tree Segmentation, RFM Analysis, Churn Modeling
- Data Integration & Management:** CRM Data Management, Transactional & Campaign Data Integration, ETL Automation (Python, Alteryx), Data Standardization, Process Optimization, Reporting Automation, Collaboration with Data Engineering
- Predictive & AI-Powered Analytics:** Predictive Modeling, AI-Powered Customer Behavior Analysis, High-Value Customer Identification, Personalization Strategies, Marketing Forecasting, Engagement Analytics, Funnel Analysis, KPI Monitoring, Scenario Simulations

## Professional Experience

### Marketing, Growth & Product Analyst, Discover Financial Services

07/2024 – Present | Remote, USA

- Analyzed end-to-end acquisition funnel for Discover Cashback Credit Card using Python and SQL, using cohort analysis and funnel decomposition to find drop-off drivers across digital touchpoints, improving conversion rates by 8% and reducing multi-stage abandonment.
- Built customer propensity and value prediction models using Python and SQL to improve acquisition targeting, increasing approval prediction accuracy by 12% across 1.2M+ monthly transactions.
- Developed a Bayesian testing and uplift modeling framework to evaluate APR incentives, merchant placements, and messaging strategies, driving an 18% increase in conversions across 50+ A/B and multivariate tests.
- Analyzed campaign performance across paid media, email, and digital acquisition channels using ROI, CAC, and lift metrics to identify high-performing campaigns, improving marketing efficiency by 23%.
- Developed real-time growth dashboards in Power BI and Looker tracking funnel conversion, campaign attribution, merchant engagement, and risk signals, enabling faster decision-making and reducing reporting turnaround time from 5 hours to 2 hours.
- Led acquisition lifecycle analytics using Google Analytics, HubSpot, SQL, and Python, leveraging attribution modeling, segmentation, and retention cohort analysis to optimize CAC, CLV, and channel mix strategy, improving acquisition efficiency by 29% and forecast accuracy by 10%.

### Marketing Data Analyst, HDFC Bank

08/2022 – 05/2023 | Pune, India

- Analyzed customer, transaction, and campaign data using SQL to improve targeting accuracy and identify opportunities that contributed to an 18% improvement in campaign ROI.
- Engineered cross-channel marketing analytics across retail, digital, and branch banking channels using segmentation, offer response modeling, and A/B testing, improving campaign effectiveness by 22% and supporting product mix decisions.
- Developed KPI dashboards in Looker, Google Data Studio, and Excel to monitor deposits, loans, and market share trends, reducing reporting time and improving decision-making speed by 25%.
- Applied advanced analytics including decision trees, RFM analysis, churn modeling, and time-series forecasting to identify high-value banking customers and support credit risk segmentation strategies increasing retention by 20% while driving user engagement and growth.
- Collaborated with product, finance, risk, and digital banking teams to align KPIs, integrate datasets, and deliver actionable insights to senior leadership, enabling cross-functional decision-making and enhancing strategic alignment and operational efficiency across retail banking.

### Product Analyst, Infinite Infolab

01/2021 – 07/2022 | Pune, India

- Conducted A/B and multivariate testing alongside behavioral funnel analysis, driving product improvements that increased user engagement.
- Built scalable adoption and churn dashboards integrating REST APIs and SQL pipelines, establishing data trust for product decision making, while enabling lifecycle monitoring of features with conversion metrics and retention insights at scale.
- Collaborated with data scientists to align ML feature importance with product hypotheses, prioritizing analytics driven roadmap items, and delivering insight presentations using visual storytelling to build consensus across product, engineering and leadership teams.

## Education

University at Buffalo, New York, USA

Master of Science (MS), Business Analytics

07/2023 – 06/2024

Pune Institute of Computer Technology, Pune, India

Bachelor of Engineering (B.E.), Computer Engineering

08/2018 – 05/2022

## Projects

### Amazon Global Sales Analysis Dashboard (Power BI) – [GitHub](#), [Dashboard](#)

- An interactive Power BI dashboard analyzing Amazon global sales data, enabling users to explore revenue trends, regional performance, product insights, and key business metrics through dynamic visualizations, filters, and data-driven storytelling experience platform.

### Netflix Analytics Dashboard (Tableau) – [GitHub](#), [Dashboard](#)

- An advanced Tableau dashboard for Netflix data analysis, providing interactive exploration of titles, genres, release dates, descriptions, and content trends, helping users gain insights into viewing patterns and content distribution globally analysis platform.
