SAP MM Consultant | S/4 HANA Specialist | Material Master & Data Migration Expert

Professional Summary

Highly skilled SAP MM Consultant with over 5 years of comprehensive experience in Materials Management, specializing in **SAP S/4HANA**. Proven track record across two full lifecycle SAP ECC to S/4HANA implementations and multiple global rollout projects. Expert in **end-to-end SAP MM solution design, configuration, and optimization within S/4HANA environments**, including **Procure-to-Pay (P2P), Inventory Management, Material Valuation, Vendor Evaluation, and Batch Management**. Proficient in designing and executing robust, error-free **data migration frameworks** using tools like BODS, LSMW, LTMC, and SAP BAPIs, ensuring data integrity and consistency. Adept at seamless cross-functional integration with FI/CO, SD, PP, and WM modules. Possesses strong analytical, problem-solving, and **project coordination skills**, frequently **collaborating with ABAP teams** for custom developments and leading initiatives. Recognized for delivering impactful SAP MM solutions, collaborating closely with business stakeholders, and ensuring compliance with SAP Best Practices and Agile methodologies.

Skills

- **SAP S/4HANA MM Expertise:** Deep proficiency in configuring and optimizing core MM processes within S/4HANA.
 - **Procure-to-Pay (P2P):** Purchase Requisitions, Purchase Orders, STO, Contracts, Release Strategies, Pricing, Invoice Verification, Supplier Management.
 - **Inventory Management:** Goods Receipts, Goods Issues, Stock Transfers, Physical Inventory, Batch Management.
 - **Material Valuation & Master Data:** Material Master (MM01/MM02), Account Determination (OBYC), Split Valuation, Vendor Master, Purchasing Info Records.
 - **Cross-Functional Integration:** MM-FI/CO, MM-SD, MM-PP, MM-WM.
 - **Data Migration & Governance:** BODS, LTMC (Migration Cockpit), LSMW, SAP BAPIs, IDOCs, EDI processes, SAP MDG, Data Cleansing & Validation.
 - **System Integration:** Deep expertise in MM-FI/CO, MM-SD, MM-PP, MM-WM, MM-PM.
 - **Programming & Scripting:** Python, VBA, Advanced Excel Formulas, SQL
 - **SAP Technologies:** Fiori Apps, SAP Best Practices, Custom Queries (SQVI), Debugging (ST22), Solution Manager.
 - **Project Management & Methodologies:** Agile, Cross-functional Collaboration, Full Lifecycle Implementations, Project Coordination, Stakeholder Management, Requirements Gathering, Defect Management, Cutover Planning & Execution, Hyper-care Support.
 - **End-to-End SAP MM Configuration:** PR, PO, GR, invoice verification, subcontracting, consignment, stock transfers.
 - **Advanced Data Handling:** Complex Excel transformations, Python-based reconciliation scripts, and SQL validations.
 - **Testing & Cutover:** SIT/UAT defect resolution, mock migrations, and go-live delta load checks.
-

Professional Experience

Nutrien – Loveland, CO

Aug 2024 – Present

Senior SAP Consultant

Environment: *SAP S/4 HANA 2022, MM, PP, SD, WM, BODS, AWS EC2/S3*

- Configured and optimized **material master data (MM01/MM02)**, including purchasing, MRP, and accounting views, ensuring alignment with **S/4HANA 2022 standards** across 10+ company codes and multiple business units.
- Provided comprehensive **post-implementation support, troubleshooting, and system enhancements** for end-to-end **SAP MM processes** in the S/4HANA environment.
- Implemented configuration management practices for **ETL scripts, SQL queries, and SAP BODS** workflows using Git to maintain code integrity, version control, and audit readiness.
- Designed **CI/CD** pipelines aligned with configuration management standards using **Jenkins and GitHub** Actions to automate deployments of SAP data migration processes.
- Developed **Infrastructure-as-Code (IaC) solutions** with Terraform and Ansible to manage cloud-based (AWS S3, RDS) environments, ensuring standardized configurations and repeatable deployments.
- Established configuration baselines **for SAP MM and S/4 HANA** migration projects, streamlining change management and ensuring consistency across all development, testing, and production environments.

- Debugged and resolved critical **MM transaction failures** (ME21N, MIGO, MIRO) by pinpointing root causes in incorrect movement types, valuation mismatches, and configuration errors, often **collaborating with ABAP developers** for complex issue resolution.
- Analyzed complex business requirements to design and deliver robust **end-to-end SAP MM solutions**, including providing **functional specifications for custom ABAP developments** where standard solutions were insufficient.
- Analyzed complex business requirements to design and deliver robust **end-to-end SAP MM solutions** in line with global best practices for procurement and inventory.
- Managed and optimized **inventory management processes**, including **stock transfers (STO)**, **material valuation**, and **batch management**, enhancing accuracy and traceability for high-value items.
- Expertly managed **release strategies**, **intricate pricing procedures** (condition types, access sequences), and **taxation configurations** within S/4HANA, ensuring compliance and reducing manual intervention.
- Developed and enhanced **BODS ETL pipelines** to migrate over 10 million records of material, vendor, and stock data from legacy ECC systems to S/4HANA, ensuring data integrity and consistency.
- Engineered **Excel-based load files** utilizing advanced formulas, pivot-based cleansing, and VBA automation to streamline data preparation for large datasets and executed rigorous field-level validation during 5+ mock loads.
- Integrated **MM with PP for BOM-driven procurement** processes and with **WM for automated goods movements** (MIGO 101, 309, 311), significantly improving material flow and inventory accuracy.
- Conducted stress tests on complex **MRP scenarios** (MD01N, MD02), ensuring correct procurement type triggers (external procurement, in-house production) for raw and semi-finished materials to optimize stock levels.
- Debugged and resolved critical **MM transaction failures** (ME21N, MIGO, MIRO) by pinpointing root causes in incorrect movement types, valuation mismatches, and configuration errors, minimizing operational downtime.
- Participated actively in **cutover activities**, including final delta data loads, comprehensive open PO validations, and GR/IR reconciliation (MR11), ensuring a seamless transition to the new S/4HANA landscape.
- Collaborated directly with functional stakeholders and MDG teams to validate and enforce **material master governance rules (MDG)**, improving data quality at the source.

Infosys Ltd – Hyderabad, India

Oct 2022 – July 2023

SAP Consultant

Project: SAP AFS to S/4 HANA Migration (Global Rollout) | Environment: SAP ECC, S/4 HANA, MM, SD, WM, LTMC, BODS

- Designed and implemented end-to-end material master migration pipelines, creating BODS jobs to handle complex legacy-to-S/4HANA field mapping, cleansing, and transformation for a global retail client.
- Developed and refined **LTMC** (Migration Cockpit) upload templates and migration objects for critical data points including purchase orders, contracts, source lists, and vendor master data.
- Executed 5+ mock **migration** cycles, performing 100% error log analysis and iteratively refining mapping rules for complex attributes like units of measure and valuation classes, reducing final migration errors by over 80%.
- Built Excel macros and **Python scripts** to cleanse large datasets, identifying and correcting over 5,000 duplicate vendors and 15,000 incomplete material records based on business rules.
- Resolved SIT/UAT defects by analyzing dumps (ST22) and configuration inconsistencies, **providing insights to ABAP teams** for bug fixes related to custom developments.
- Configured intricate **purchasing and inventory** workflows including release strategies, automatic **PO generation**, and custom movement types (OMJJ) within **S/4HANA**, aligning with new business processes.
- Integrated and tested **MM-SD** for order-to-cash scenarios and **MM-FI** for **GR/IR** account validation, ensuring seamless financial postings and accurate revenue recognition.
- Developed custom **SAP queries (SQVI)** to validate open purchase orders, historical goods movements, and inventory balances, providing critical data insights during and post-migration.
- Resolved **SIT/UAT** defects by analyzing dumps (ST22), identifying configuration inconsistencies in MRP settings, purchase group errors, and account assignments (OBYC), ensuring system stability.
- Collaborated directly with **cross-functional teams** to finalize data governance templates and validate material descriptions against global naming conventions, improving master data quality.
- Participated actively in detailed cutover planning sessions, executing delta loads, and performing final **data reconciliations** immediately before go-live, minimizing business disruption.

SAP Consultant*Project: European Client – MM Rollout Project*

- Configured **material master** (material types, number ranges), **vendor master** (account groups, partner functions), and purchasing organization views in SAP ECC to align with specific regional rollout requirements across 7 European countries.
- Performed data extraction from diverse legacy systems using **direct SQL queries** and advanced Excel techniques (VLOOKUP, INDEX-MATCH), followed by precise data mapping to SAP templates.
- Built and executed **LSMW upload programs** for mass data loads of purchasing info records and pricing conditions, successfully handling over 100,000 records per cycle with minimal errors.
- Conducted comprehensive **cross-module integration testing** (MM with PP for production orders, SD for sales orders, and WM for warehouse movements) to validate end-to-end business workflows.
- Managed UAT defect logs (HP ALM), performing deep-dive troubleshooting on procurement workflows and **collaborating with development teams (including ABAP)** for resolution.
- Designed and executed **inventory stock initialization strategies** using MB1C and MR21 for valuation adjustments, ensuring accurate opening balances post-go-live.
- Managed UAT defect logs (HP ALM), performing deep-dive troubleshooting on procurement workflows (MIGO/MIRO discrepancies) and collaborating with business users for resolution.
- Implemented **split valuation** for raw vs. semi-finished materials (VPR1, VPR2) to maintain precise cost accuracy and differentiate valuation types during the multi-country rollout.
- Supported master data cleansing activities, coordinating with business users to resolve data quality issues before migration.

SAP MM Consultant

- Collaborated on global template design and localization tasks to deploy scalable SAP MM solutions across multi-regional teams.
- Configured foundational **Material Master (FERT, ROH), Vendor Master, Contracts, Info Records, Pricing Conditions, BOMs, and release strategies** in SAP ECC 6.0, following SAP best practices.
- Oversaw **Purchase Requisitions (PRs)** and **Invoice Verifications (MIRO)** to streamline procurement and vendor payment processes.
- Conducted training sessions on Material Management functionality, enhancing user adoption and understanding.
- Prepared and tested **LSMW templates** for vendor and material data migration during initial sandbox phases, ensuring a strong understanding of data loading procedures.
- Actively performed **PO and GR/IR cycle testing** as part of integration workshops, gaining hands-on exposure to end-to-end procurement processes and issue resolution.
- Assisted senior consultants in preparing training documentation and user manuals for SAP MM functionalities.

SAP Analyst

- Developed and executed **test scripts** for **SAP MM** and **SD modules**, covering **Procurement, Inventory Management, and Invoice Verification**; conducted **end-user training** sessions to ensure seamless adoption.
- Gathered requirements for **STO (Stock Transport Order)** processes and collaborated with senior **MM** and **SD consultants** to configure **inter-plant** and **inter-company stock transport** scenarios; led the **implementation phase**.
- Partnered with **IT** and **business stakeholders** to deliver innovative **SAP MM solutions** addressing critical **business** and **technological challenges**.
- Assisted in maintaining and monitoring **Plant Maintenance (PM)** modules, ensuring **system performance** and **data accuracy**.
- Supported **SAP implementation projects**, ensuring compliance with defined **service-level agreements (SLAs)** and **operational requirements**.

Education

- **University of Central Missouri** – M.S. in Computer Science | Aug 2023 – May 2025 | GPA: 3.66/4.0
- **Andhra University** – B. Tech in Computer Science and Engineering | 2016 – Sep 2020 | CGPA: 8.07/10.0
