CAREER GOALS

My primary goal is to grow my skills as a software engineer with a strong desire to learn and adapt. I am very open to expanding my skillset for any programming language or system framework needed by any team I may work with.

I wish to pursue a career in which I can create great experiences for people through computer programming and software.

EXPERIENCE

Tata Consultancy Services (TCS) – *Software Engineer*

Aug 2021 - Apr 2025

Worked with TCS as a software engineer. 3 years of project experience. Primary Focus on Java, JavaScript, and other Java related frameworks. Mostly worked with frontend web applications, SQL, and some backend support.

Key work from TCS

- Worked with a team to update a web application by migrating the framework from a legacy system to ReactJS
 - Assisted setup for usage log tracking in ReactJS to replicate a legacy system
 - Worked on some bug fixing for various UI components
-
- Maintained various API endpoints through Java Spring Boot framework
 - Assisted some teams with deployment using Jenkins Pipeline
-
- On call application support with a client using Manhattan Warehouse Management System (WMS) and Oracle SQL system

Languages and Frameworks

Java
JavaScript
AngularJS
ReactJS
Spring/Spring Boot
AWS
Oracle SQL

- Operated as an admin to help maintain a SQL database in backend using WMS
- Some exposure to Linux as needed for maintaining and navigating servers used by WMS
- Some experience with AWS as needed to maintain services and server monitoring used in WMS

EDUCATION

University of Hawai'i at Hilo — *Bachelor of Science in Computer Science*

Graduated: May 2021

- Primary study in C++ and object oriented programming
 - Related coursework: Data Structures, Database Analytics, Programming Languages, Systems Programming, Software Engineering
-
- Led a team of three using agile practices by working with an existing frontend application and integrating a new backend built in a LAMP stack environment (Fall 2020– Spring 2021)
 - Worked with a team to design and develop a functioning database for a mock supermarket (Spring 2021)
