

FRANCIS HERNANDEZ

+1 (760) 518-9638 | FH.FrancisHernandez@outlook.com | San Diego, CA

EDUCATION

California State University - San Marcos

December 2025

Bachelor's, Business Analytics

- Coursework: Machine Learning, Visual Analytics, Data Mining, Statistical Analysis, Predictive Modeling, Business Intelligence

PROFESSIONAL EXPERIENCE

EssilorLuxottica

San Diego, CA

Licensed Optician | Lead Laboratory Technician

November 2017 - Present

- Tracked and monitored multiple operational metrics simultaneously including turnaround time, quality controls, compliance ratings, and inventory levels, demonstrating strong organizational skills and attention to detail
- Cut turnaround time 43% (14 to 8 days) through process optimization, achieving 95%+ on-time delivery of patient eyewear orders
- Elevated operational compliance rating from 2.5/5 to 4.85/5 through development and implementation of protocols and staff training programs aligned with industry regulations and business objectives
- Trained and supervised team members on operational procedures, quality standards, and process improvements to maintain consistent performance

Office Depot

San Diego, CA

Furniture Sales Manager

August 2014 - November 2017

- Trained and supervised team of 4 sales associates on consultative selling strategies, product knowledge, and customer service best practices to improve team sales performance
- Consulted with clients on office and home furnishing solutions, providing space planning recommendations and connecting businesses with qualified decorators to optimize workspace design
- Developed repeat client base through personalized recommendations and follow-up, generating consistent referrals
- Maintained comprehensive knowledge of product lines, pricing, inventory availability, and design trends to provide tailored recommendations matching customer needs and budgets

PROJECTS

Drought Severity Forecasting & Trend Analysis | R, Power BI, Excel

- Analyzed 25 years of drought data (2000-2025) using R and Excel to identify cyclical patterns and forecast future severity trends, revealing peak periods (2014-2016, 2020-2022) and regional vulnerability across California
- Performed time series analysis and statistical calculations to quantify drought severity metrics and seasonal trends for long-term forecasting
- Built interactive Power BI dashboard visualizing historical trends and forecast projections to support resource planning and risk management decisions
- Delivered actionable insights on regional patterns and seasonal cycles to inform allocation strategies and operational planning

Customer Behavior Forecasting & Predictive Analytics | R, Power BI, Excel

- Built forecasting models in R achieving 78.1% AUC to predict customer redemption behavior, analyzing 3,999 customer records using logistic regression and decision tree classification
- Performed data cleaning and preparation in Excel and R using IQR outlier detection and mean imputation to ensure data quality and model accuracy
- Applied stepwise AIC feature selection to identify key predictive variables, revealing flight activity and bonus miles as strongest drivers of redemption behavior
- Created data visualizations including correlation heatmaps, ROC curves, and performance charts to communicate model results and support business decision-making

Customer Segmentation & Performance Analytics | Excel, ArcGIS, Google Analytics

Capstone Project

- Analyzed target audience demographics using ArcGIS and Excel to identify subscriber segments by age, occupation, and location patterns for strategic targeting
- Conducted competitive analysis in Excel to benchmark performance metrics and identify growth opportunities in the local newsletter market
- Built performance tracking framework using Google Analytics to monitor subscriber growth, engagement rates, and conversion metrics across multiple channels
- Defined KPIs and performance benchmarks to measure campaign effectiveness and inform data-driven strategy decisions

TECHNICAL SKILLS

Languages: SQL, R

Analytics and Business Intelligence: Power BI, DAX, Power Query, Google Analytics

Data Science: Machine Learning, Forecasting, Predictive Modeling, Statistical Analysis, Data Mining

Tools and Platforms: Excel (Advanced), RStudio, ArcGIS, Microsoft Office Suite, MySQL
