WORK HISTORY

QA Analyst at Centene Corporation

January 2024 - February 2025 (1.5 Years)

- Review and analyze user stories (AC's) requirements and identify the missing acceptance criteria's, change in requirements and clearly define acceptance criteria for user stories and prioritize those stories with Product Owner for releases. • Designed Test Cases as per the Stories business requirements and Functional Design Document. • Created and maintained all Test Plan, Test Cases in QC-ALM. • Tested the various components of system, Integration, functionality, User Interfaces and Security of the web application. • Tested Healthcare Provider for Credentialing, data integrity and Claim End-to-End process. • Involve in applications analysis and testing which included claims (837I and P) processing as per EDI ANSI-X-12 transactions standard. • Manually executed functionality of each screen to monitor proper navigation of different screens in the respective applications. • Submit an environment request prior to use and also to make sure if any environment conflict. • Identification of QA milestones for multiple projects and QA scheduling • Perform User Acceptance Testing

Data Analyst at Holiday Inn Express

August 2022 - November 2023 (1.5 Years)

- Leveraged Python and SQL to analyze large datasets of guest information and booking patterns, leading to improved guest experience and operational efficiency. • Developed and maintained interactive Power BI dashboards for KPI tracking and performance analysis, enhancing decision-making processes. • Implemented machine learning algorithms to forecast occupancy rates and optimize dynamic pricing, resulting in increased revenue and occupancy. • Conducted A/B testing to improve website conversion rates and booking engine performance, leading to higher customer engagement and sales. • Utilized data mining techniques to identify guest segments and personalize marketing campaigns, increasing marketing effectiveness and customer satisfaction. • Collaborated with cross-functional teams using SQL and Python to drive data-informed decision-making, resulting in improved strategic planning.

Front-End Developer at Digital Garden, Rutgers University

September 2021 - August 2022 (1 Year)

- Developed a collaborative website where individuals can create accounts, boards, and share ideas with others in real-time, enhancing user engagement and collaboration. • Implemented user authentication, board creation, site navigation, and real-time collaboration features, improving user experience and enabling seamless teamwork. • Followed Scrum methodologies, participated in daily stand-ups, and utilized GitHub for version control and Figma for design collaboration.

EDUCATION

Rutgers University - Bachelors Degree

Graduated 1970-01-01

- Computer Science

SKILLS

- MS-Access, To complete
- Microsoft Word, To complete
- HTML, To complete
- Java (Programming Language), To complete
- JavaScript (Programming Language), To complete
- .NET Framework, To complete
- PHP (Scripting Language), To complete
- VBScript (Visual Basic Scripting Edition), To complete
- Microsoft Excel, To complete
- Microsoft Windows, To complete
- A/B Testing, To complete
- User Experience (UX), To complete
- Acceptance Testing, To complete
- API, To complete
- Advertising Campaigns, To complete
- Agile Methodology, To complete
- Analytical, To complete
- Data Analysis, To complete
- ASC X12 Standards, To complete
- JIRA, To complete
- Automation, To complete
- Customer Relationship Management, To complete
- Business Efficiency, To complete
- Business Requirements, To complete
- C Sharp (Programming Language), To complete
- Unix, To complete
- C++ (Programming Language), To complete
- Client Server Models, To complete
- CSS, To complete
- Decision Making, To complete
- Claim Processing, To complete
- Communication, To complete
- Databases, To complete
- Credentialing, To complete
- Customer Satisfaction, To complete
- Data Integrity, To complete
- ETL, To complete
- Data Transformation, To complete
- Mining Data, To complete
- Data Quality, To complete
- Relational Databases, To complete
- IBM InfoSphere DataStage, To complete
- Perseverance, To complete
- Performance Management, To complete
- Engine Tuning, To complete

- Sales, To complete
- Forecasting, To complete
- Github, To complete
- Leadership, To complete
- Health Care, To complete
- Javasever Pages, To complete
- Junit, To complete
- Python (Programming Language), To complete
- Machine Learning, To complete
- Marketing Effectiveness, To complete
- Visual Studio 2015, To complete
- Microsoft Office, To complete
- Microsoft SQL Servers, To complete
- Mule, To complete
- Open Source Technology, To complete
- Operational Systems, To complete
- Oracle Databases, To complete
- Oracle Applications, To complete
- Microsoft PowerPoint, To complete
- Scrum (Software Development), To complete
- Quality Management, To complete
- Requirements Elicitation, To complete
- Social Media, To complete
- Software Engineering, To complete
- SQL Databases, To complete
- Strategic Thinking, To complete
- Design for Testability, To complete
- Test Planning, To complete
- Testng, To complete
- TypeScript, To complete
- User Stories, To complete
- VersionOne, To complete
- Web Applications, To complete
- Web-Services, To complete
- Extensible Markup Language (XML), To complete
- Front End (Software Engineering), To complete
- Testing, To complete
- Coordinating, To complete
- Git, To complete
- Team-working, To complete
- Self Motivation, To complete
- GraphQL, To complete
- Web Technologies, To complete
- Selenium Webdriver, To complete
- Software Version Control, To complete
- Servicenow, To complete
- Curiosity, To complete
