EDUCATION

2021 to 2026 Bachelors of Science in Information Systems Management and Information Assurance, Data Analytics Certification June,2025 University of Maryland University College (UMGC) Largo, MD

01/2024 – Present – DISA J432- Logistic Services Division Policy & Compliance/InfiniSource Consulting Solutions Inc Fort Meade Md, Responsibilities:

- Monitor and Update EMTS2 for Taskers, Financial Liability Investigation of Property Loss (FLIPL) Tracker and databases on SharePoint.
- Attend FLIPL Team Meeting, Investigation Meetings,
- Monitor, update and refresh the FLIPL Metrics (Power BI) performance charts of the agency's offices assets and acquisition cost.
- Data assurance on Compliances and Policies APO packets.
- Currently learning other areas like DISA Enterprise Logistics Portal (DELP), Defense Property Accountability System (DPAS), Defense Federal Acquisition Regulations Supplement (DFARS)
- Data scrubbing (FLIPL) the Financial Liability Investigation of Property Loss database.

06/2023 – 11/2024 – Air Force (A3TR)/Primcorp Inc, Arlington, Va Readiness Reporting Data Responsibilities:

- Validate documents for logical structure, compliance, and alignment with senior leadership expectations.
- Prepare briefing materials, reports, and support enclosures for senior-level review and approval.
- Perform readiness analysis and assist in forecasting and messaging for Air Force leadership.
- Extract, manipulate, and present readiness-related data from The Defense Agency Initiative Programming Budget Execution System (PBES) and Envision ERP System, Advana, DRRS, Readiness Management Tool (RMT) and multiple sources.
- Support AF/A3TR and other team lead analysts in achieving operational objectives, such as Flying Hours Program (FHP), 1to N reporting tool, PEM Parade, POM, Presidential Budget and the Congressional Budget Analysis.
- Create decision-quality materials for high-level leadership discussions and strategy development using the NIPR and SIPR.
- Assist the Strategic, Planning, Programming, Budget and Execution Analyst by conducting analysis of Air Force Strategic Planning, Programming, Budget and Execution Process related issues associated and linked to AF readiness.

- Workflow Manager - Task Management Tool (TMT/ETMS2) Responsibilities:
- Manage the Task Management Tool (TMT/ETMS2) on NIPR and SIPR networks to ensure efficient task processing.
- Accept and process taskers related to Readiness, ensuring proper tracking and execution.
- Triage incoming tasks, assign appropriate priorities, and proactively follow up on outstanding actions with Division Chiefs, Contractors, other Offices, and MAJCOMs.
- Ensure senior leader decisions are communicated clearly and accurately through well- prepared correspondence.
- Assist leadership by drafting, reviewing, and editing correspondence, reports, and task packages to ensure clarity, completeness, and adherence to established formats and standards.
- Serve as the primary point of contact for coordinating correspondence with internal teams and external stakeholders, including OSD Front Offices, Joint Staff, Defense Agencies, Congress, and other government organizations.
- Professionally engage with senior leadership and stakeholders to ensure efficient task execution and issue resolution.
- Provide excellent customer service via phone, email, and in-person communication.

Skills

Data Management: SQL, ETL, Data Analysis, Data Warehousing

Business Intelligence: Power BI, Tableau, PBES, DRRS, Envision, RMT, SharePoint, Excel, SAS

Software Development Life Cycle: SDLC, SOX Compliance

Database Management: Oracle, Business Objects, Unix/Linux

Clearance: DoD SECRET, DHS SECRET

08/2021 – 6/2023 - Navy Federal Credit Union, Vienna, VA // Pensacola, FL
Data/Business Analyst/Risk and Fraud Management Specialist

- Execute daily SQL script to pull pipeline data into an excel spreadsheet, that Identify patterns of activity indicating compliance code levels (numbers) of or account abuse.

- Modified and refreshed four PowerBi dashboards to monitor the accumulative financial data and performances for the Risk Management team.

- High priority ADHOC requests to create 4 dashboards for DR&L team, Fraud Model and the HELOC teams for leadership to present at the Quarterly meetings.
- Streamlined processes in SharePoint, Business Objects, PowerBi and Excel.
- Modified monthly and quarterly financial PowerPoint reports for leadership presentations.
- The dashboard metrics that gave leadership a visualization of financial monthly and yearly data pulled from pipeline data in the database and filtered Mitigated financial year to date data.
- There were 4 other tabs that have data from POA, HELOC, POA, Subordinations and Misrepresentations.
- Verify findings of discrepancies in financial reports by creating or modifying scripts or queries to pull data from databases.
- Created automated excel reports and dashboards using resources like Business Objects, SharePoint, MSP, Empower and databases to monitor account transactions to proactively identify financial data, suspicious communications, take immediate corrective/protective action, and escalate alerts/cases to the appropriate Security division for in depth investigation.
- Completed Ad hoc client requests for financial and performance reports by researching sources, using queries, excel and dashboards to formulate data.
- Communicate with internal and external customers on integrity issues, problem resolution, and account information as defined by internal policies, processes and procedures.
- Identify and analyze opportunities for new and/or improved processes, data, or technology; provide clear picture of possible outcomes.
- Recommend management changes to fraud detection rules to identify new fraudulent schemes arising from new products and services or fraud patterns.
- Develop, recommend, and document adjustments to workflow to streamline processes.
- Involved in driving continuous process improvement to increase member experience quality; reduce losses; minimize financial risk and maintain high operational efficiency.
- Identify and assess business strategies and opportunities; develop appropriate analytical approaches.

- Supports the TOA Development Team by making sure technical accuracy and completeness of military equipment listed in the Expeditionary Management Information System (EXMIS) and TOA Viewer.
- Extract, Transfer and load updated files from and to Maximo, EMIS and TOA Viewer.
- Perform with an understanding for data management of TOA Assemblies and stock numbers under the purview of various Navy Systems Commands (SYSCOMs).
- Provide support of required cost and gap analysis, liaison with SYSCOMs to support technical updates and standardization of equipment, liaison with Program Analysts/Program Managers to support stock number revisions, quality control and quality assurance reviews, establishment and monitoring compliance with data standards, and creation of data analysis reports.

- Use data from sources like Required Operational Capabilities/Projected Operational Environment (ROC/POE), Concepts of Operations (CONOPS), Activity Manpower Documents (AMDs), and the TOA portal to present data analysis results in formal briefs to the client.

5/2019 – 10/2019 TSA Annapolis Junction MD 20701 Data Management Specialist

- Responsible for maintaining the integrity of the Secure Flight system data. Receives, inspects, validates, transforms, cleanses, and loads data received in a variety of formats (e.g., Excel, CVS, XML) from a variety of sources (e.g., air carriers, federal organizations). Identifies erroneous or anomalous data and takes actions to correct or remove errors in order to restore data sets to reliable levels.
- Provides support to Systems Management and Operations teams by troubleshooting applications and data problems and fulfilling data requests. Supports the Secure Flight Technology branch by assisting with performance tuning, troubleshooting, and data application investigations.
- Execute SQL queries and scripts to process files.
- Supports the operational mission during all maintenance and deployment activities by preparing and verifying the production environments with critical application and data testing.
- Captures and reports on all data management activities.
- Data Migration during server maintenance.
- Tracks data-related issues, problems, and performance metrics for historical reporting purposes.
- Monitor ETLs processes.

2/19 – 5/2019 Quadrant /Telesis – Air Force/Andrews Air Force Base MD 20762 Data Analyst /Help Desk

- Collects data on a continuing basis utilizing a variety of sources and systems.
- Reviews and examines all data from customers' tickets and provides metrics; reports any problems found and makes recommendations.
- Use the Help Desk software ServiceNow ticketing system to track and record all transactions.

- Collects and merges data from databases and spreadsheets to display into other formats.
- Perform data functions in Excel including Pivot and Lookup tables.
- Utilize industry standard best practices for problem solving.
- Research and investigate alternate solutions from various sources when necessary.
- Runs various mathematical calculations to determine how the data metrics might best be applied to improve program activities.
- Ability to patiently listen and understand the client's issue or concerns.
- Use appropriate judgment to identify, prioritize and escalate issues requiring urgent attention.

- 2/2016-2/19 ARRAY/AIR FORCE Information Tech Pentagon, Arlington/Fairfax, VA 22310 Data Analyst/Administrator
- Works under minimal supervision
- Worked with the Civilian and Military leadership with the budget.
- Defines data migration needs (in ABIDES an Air Force Budget System)
- Identifies data relationships and details on missing relationship data, duplicate columns, and redundant data.
- Use data mining techniques to define data.
- Uses UNIX Commands to collect data.
- Uses EXCEL techniques and models to define data for data integrity and process analytics.
- Explains and documents data mining techniques and results.
- Processed Budget (PB and POM) files through Financial ETLs.
- Provides information on data content, including any data standardization issues and ambiguities between older and more current data.
- Interacts with the Subject Matter Expert (SME) community to clarify how SMEs would like to use data, types of reports, and workflows needed.
- Interact with senior level clients and project managers on a regular basis.
- Responsible for providing analysis and support for OBIEE load and performance testing.
- Responsible for installation, configuration and maintenance of the Oracle database and Oracle Integrator including documentation of all custom settings and configurations.
- Provided a final solution that meets customer needs and expectation to successfully replace the old Oracle Warehouse Builder and Oracle Discoverer tools with OBIEE and ODI.
- Validate Reports transferred from the old server to the OBIEE server.

6/14-2/16 (Fannie Mae) Washington, VA 22310 Data Analyst

- Gathers user requirements for database changes, analyzes database requirements,
- Create specifications for the ETL team to load the data to the database, participate in functional design sessions, create and execute test scripts for the load of the database, and aid in the escalation/resolution of data issues.
- Identifies data relationships and details on missing relationship data, duplicate columns, and redundant data.

- Create documentation of detail-oriented processes and Reconciliation Reports, problems, resolutions
- Uses UNIX Commands to collect data store in Ebinders on Share Drive and SharePoint
- Run queries in TOAD and BOXI to verify data to complete Reconciliation Reports.
- Uses EXCEL techniques and models to define data for data integrity and process analytics.
- Use WebEx to shadow and reverse shadow team members to help complete report.

- Provides information on data content, including any data standardization issues and ambiguities between older and more current data.
- Create Group mailboxes to communicate via email to projects.
- Create incident tickets in Remedy on Data Quality issues.
- Participate in the Procedure team to modify and update.
- Worked on the Business Process and Improvement team (automated reconciliation reports)
- Interacts with the Subject Matter Expert (SME) community to clarify how SMEs would like to use data, types of reports, and workflows needed
- Interact with senior level clients and project managers on a regular basis.

9/12-6/14 Contemp Inc., Food and Drug Administration Washington, DC OSI Data Analyst/Information Specialist

- Maintain a list of division purchased software, serving as a contract for those in their division when software is needed.
- Software installation request.
- Troubleshoot all department IT hardware and software requests before creating help desk tickets.
- Provide the CITL with a list of employees who are eligible for a PC refresh.
- Research and evaluate data from support of the OSI database reports.
- Respond to agency IT-related data calls (such as Microsoft license verification)
- Respond to

- Updated Shares permission tracker
- Admin support for ECMS (SharePoint) and permission tracker
- Desktop helpdesk support for customers with mapping to network printers, Transition from Operating system XP to Win7
- As the Information Specialist /IT Coordinator I communicated with the helpdesk with software and
- Hardware issues from the users and with the users with software upgrades and updates. I also was responsible for hardware refresh and replacements.
- Place and track service requests in HP Service Manager
- Implementation team updating the OSI database (access), function test, metric testing in both production and test environment. Customer requirements for changes and update using dashboard in daily meeting with developer.
- As IT Coordinator for the Office of Scientific Investigation, I was responsible for all electronic
- (Litigation) data stay in compliance with FDA Regulations. I was also in the Meningitis team for stored data.
- Update Manuals with new procedures
- Implement and test (executing queries) new software programs.
- Use and supports database applications and analytical tools.

9/12-10/12 Mantech-INS Indian Head Naval Base (DOD) Washington, DC Business Support Technician

- Identify problematic areas and conduct research to determine the next course of action to resolution of Government classified data.
- Complete reports are essential to financial directorate operations in a timely and organized fashion. (Financial Orders report, and the Revolving Fund Daily Report)
- Evaluate/problem solve common issues that deal with network support for the Department of Defense
- Resolve technical issues with workstations using remote connectivity via Microsoft Remote Assistance
- Adjust firewall settings of users to allow/block network traffic.
- Maintain, update, reset account and login information of employees via Microsoft Active Directory/Active Roles
- Perform manual data entry, using SQL command statements.
- Closed an average of 30-50 tickets per day.

- Used Cisco telephones with I3 Client
- Managed user accounts via Active Directory
- Provide weekly updates to the Budget manual website.
- Create reports from DOD agencies and departments using Teradata.
- Installed anti-virus and ran updates on user workstations.

- 3/12-6/12 Financial Management Directorate-Data Analyst Washington, DC
- Gathers user requirements for database changes, analyzes database requirements,
- Create specifications for the ETL team to load the data to the database, participate in functional design sessions, create and execute test scripts for the load of the database, and aids in the escalation/resolution of data issues.
- Identifies data relationships and details on missing relationship data, duplicate columns, and redundant data.
- Create documentation of detail-oriented processes and Reconciliation Reports, problems, resolutions
- Uses UNIX Commands to collect data store in Ebinders on Share Drive and SharePoint
- Run queries in TOAD and BOXI to verify data to complete Reconciliation Reports.
- Uses EXCEL techniques and models to define data for data integrity and process analytics.
- Use WebEx to shadow and reverse shadow team members to help complete report.
- Provides information on data content, including any data standardization issues and ambiguities between older and more current data.
- Create Group mailboxes to communicate via email to projects.
- Create incident tickets in Remedy on Data Quality issues.
- Participate in the Procedure team to modify and update.
- Worked on the Business Process and Improvement team (automated reconciliation reports)
- Interacts with the Subject Matter Expert (SME) community to clarify how SMEs would like to use data, types of reports, and workflows needed.
- Interact with senior level clients and project managers on a regular basis.

1/09-12/11 IAP World Services (Walter Reed Army Center) Washington, DC Data Analyst

- Analyzed massive and highly complex data sets, performing ad-hoc analysis and data manipulation (SQL).
- Wrote reports using Maximo 6, IFS and Cognos reporting system to extract data for analysis using filters.

- based on the business data model.
- Maximo was used to create service and work orders, create reports, ad hoc reports, preventive maintenance schedules and inventory.
- Worked on complex information models, logical relationships, and the data structures that support.
- different data models.
- Team Lead for several projects which involved programs that interfaced with Oracle databases.
- Designed system controls to ensure Sarbanes-Oxley compliance as well as responsible for regulatory compliance audits.
- Administered a quality control auditing plan for Maximo, a program's information system.

- Created several data reporting processes from start to finish, which included the data mining, analysis and reporting pieces.
- Prepared and presented weekly reports for management to view the data team's weekly progress.
- Implement new report processes and designs.
- Created spreadsheet reports, and graphs from statistical customer data to increase reporting speed and data quality.
- Regularly interacted as liaison between the company and governmental agencies to help develop data.
- reports to improve their overall business functions.
- Mentor staff members and the customer on proper and effective use of Maximo and Cognos (automation) system.

5/2000-1/2009 Arbitron Inc. ETL Monitor Analyst

- Responsible for monitoring and operating system generated jobs for Sampling Management System (SMS)
- Processing and Daily Job Stream (ETL tool), for compliance with all process control standards.
- SFTP files from servers encrypt and decrypt.
- Provided IT production support to evaluate and resolve data problems within Oracle databases.
- Investigated client problems with transmission, load and/or execution.
- Investigated and resolved errors and/or discrepancies to ensure integrity and accuracy of data, using Unix/Linux
- Writing SQL queries to access Oracle databases
- Assessed impact of problems, prioritized the urgency, executed short-term repairs, and coordinated long-term resolutions.
- Performed end user Acceptance testing, implementation of small- and large-scale changes to
- Arbitron's methodology within Production and Research test environment.
- Created production data reports for internal departments and maintained production procedure documentation.
- Managed multiple individual tasks/projects and met strict deadlines, performing in a fast- paced, time critical environment, working both independently and as a part of a team.
- Lead and supervise projects with CATI Operators and Site Supervisors.

- Participated in Major Software upgrades (Project CATI-Central Server).
Developed and approved documentation of all DJS/SMS procedures.

- Manually “HERC” files from Linux over to UNIX (Perl shell script) when file changes are delayed.
- Train Cati Operator in creating, upload/download files.
- An essential part in the implementation/testing the new ETL (GUI) and the Central Server as the main

Employment History
