
EDUCATION**Bachelor of Science in Computer Science, UC Davis, GPA: 3.5**

Graduated 2025

Relevant Coursework: Data Structures and Algorithms, Computer Architecture, Computer Graphics, Object-Oriented Programming, Algorithm Design, Artificial Intelligence, Probability and Statistical Modeling, Machine Learning, Programming Languages, Web Programming, Computer Vision, Operating Systems Programming

TECHNICAL SKILLS**Languages:** C/C++, SQL, Python (Pandas, Pytorch, Scikit-learn), R, Go, Javascript, Java, HTML/CSS, Assembly**Frameworks:** Express/Node.js, WebGL, GLSL Shader library, SFML**Tools/Platforms:** Tableau, BigQuery (GCP), Excel, VS Code, Git, Azure Databricks, Linux, JSON

CERTIFICATES

Google Data Analytics Professional Certificate

Sept 2025

RELEVANT EXPERIENCE**Perspecta LLC**

Aug - Sept 2024

Data Science Intern (Azure Databricks ML)

- Worked in **Azure Databricks** using **Python**, **PySpark**, and **SQL** to analyze and clean large-scale national WorkComp insurance health provider datasets containing millions of records from network providers such as Prime Health, etc.
- Developed machine learning classification models to detect and correct invalid or incomplete data (e.g. inaccurate addresses) using the **SmartyStreets API** and **LexisNexis** verified provider data.
- Performed **exploratory data analysis (EDA)** to identify patterns, anomalies, and key variables influencing data quality of provider records, leading to actionable insights.
- Created visualizations such as **heatmaps** and trend analyses to communicate data quality issues and progress to stakeholders, enabling faster and more cost-effective data cleansing efforts.

Talisman Systems Group, Inc.

July - Sept 2023

Data Engineering Intern

- Built and automated **ETL processes** to migrate health provider data from the legacy WorkComp **TalisPoint platform** to **Azure**, streamlining future network provider file ingestion and reducing manual work.
- Used **Javascript** as needed to normalize data into the supported standard formats, increasing data accuracy significantly.

West Sunset Ortega Library

Jan 2018 - Aug 2019

Technology Support Specialist

- Volunteered as a tech support technician for 1.5 years, assisting diverse patrons with hardware, software applications, and Internet connectivity issues.

PROJECTS**Machine Learning: Academic Success Predictor — Flask, Python, JS, HTML/CSS**

- Analyzed UC Irvine demographic and financial data to identify factors influencing student success, performing EDA, cleaning, and statistical comparisons. Created visualizations and a Flask web app to present insights interactively.

Runescape 3 Grand Exchange Analysis — SQL, Tableau

- Built a dashboard and analyzed 3 months of Runescape Grand Exchange data (akin to a stock market).
- Cleaned and visualized price, volatility, and demand trends for expensive items, identifying optimal low-volatility, high-return investments.

Micro-Blog WebApp — Handlebars, Express, Node.js, HTML, CSS, JS, SQL, SQLite

- Built a full-stack micro-blog web app.
- Implemented user authentication (Google OAuth), post creation, liking, and deletion with persistent data management.

Chess Engine — C++, SFML

- Designed and implemented a 5000 line AI chess engine capable of playing realistic casual games, showcasing advanced programming and algorithmic skill with a GUI for a dynamic and interactive chessboard.
- Utilized the minimax algorithm with alpha-beta pruning to optimize decision-making efficiency and determine move ordering strategies.

EXTRACURRICULAR ACTIVITIES**Leetcode Club Leader (Sept - Dec 2021)**

- Led a 40-member UC Davis LeetCode Club, organizing weekly problem-solving sessions across all difficulty levels. Facilitated collaborative discussions and reviews to enhance interview preparation and tackle challenges.

Davis Computer Science Club (DCSC) – Personal Project Award Winner (2023)

- Awarded for creating a custom-built chess engine recognized as the most innovative and best overall project among members.
- Selected based on technical depth, creativity, and impact; delivered a live presentation to peers.
