

CHINMAYEE PANDA

FullStack Java Developer

Career Summary

Seasoned **Java Developer** with 4+ **years of experience** in creating professional **lightning fast web applications** that are highly **scalable and secure**. A **quick learner** who can **adapt** to new **technologies and frameworks** with great **enthusiasm and zeal**.

- Experience with developing **well designed** code that is **clean** and **precise**.
- Experience in developing code that stresses on **low memory utilization** with **fast execution time**.
- Developed **web applications** using **Spring, Spring Boot, Spring MVC, IoC, Spring JDBC, Spring Cloud, Spring Webflux(reactive stack)**.
- Proficiency in developing **RESTful** web services using **ORM** frameworks like **Hibernate** with **JPA** and **Spring Data**.
- Experience in developing secure web applications using **Spring Security** with authentication technologies like **Basic Authentication, JWT Token authentication, OAuth 2 authentication etc**.
- Experience using relational databases (RDBMS) like **MySQL, Sql Server, Oracle** and no SQL databases like **Graph QL, MongoDB, DynamoDB and AWS S3**.
- Proficiency in writing **secure database queries** that **prevent SQL injection** using prepared statements. Proficiency in working with various database objects like **views, functions, stored procedures** to **improve application performance**.
- Proficiency in optimizing spring boot applications using **Microservices Architecture** with **zero XML** configuration thereby **reducing** development time.
- Good Knowledge in **Amazon Web Services (Amazon SQS, Amazon EC2, Amazon S3, Amazon Elastic Load Balancing/Scaling, Amazon SimpleDB, Amazon EBS, Amazon EventBridge, Amazon Lambda, Amazon CloudFront and Amazon Cloudwatch, IAM)**.
- Experience with auto discovery of micro services using **eureka** server.
- Performed **test driven development** using **jUnit & Mockito** testing framework w/ more than 95% code coverage. Experience using manual api testing tools like **Postman** for **RESTful api** testing.

Aubrey, TX

Skills

- Java, J2EE,
- Hibernate 4.x/3.x, Spring 3.0, Spring Batch, Spring Security, Spring AOP, Spring Core, Spring IOC, Spring integration, Spring Boot 2, SpringBoot 3
- Micro service architecture
- Hibernate, Oracle, SQL Server, Dynamo DB, MongoDB, GraphQL
- AWS EC2, IAM, Lambda, S3, Jenkins, Docker
- Kafka, RabbitMQ
- Angular, React, Nodejs
- JUnit, Mockito
- Eclipse, IntelliJ Idea, DB Viewer, MySQL workbench, SQL Server Management System, Visual Studio Code.
- Git, SVN, JIRA

- Proficient in using **React JS** for creating reusable components along with sliders, charts, grids and handling events and DOM objects.
- ☑ Hands on experience in developing server-side JavaScript frameworks using **Node JS (Express JS, Handlebar JS)**.
- Participated in **Daily SCRUM Call Meetings** updating team on progress of software development.
- **Worked in Agile (SCRUM) environments** with two week iterations, and took part in **daily stand-up meetings** to discuss progress and development of **new features** in the **sprint**
- Used various version control software such as GIT, GIT LAB, CVS, SVN, BitBucket, Trunk based applications for maintaining code repositories.
- Deploying the applications using Docker container services and building continuous integration (CI) and continuous deployment (CD) pipeline using Jenkins with GitHub.

□ Windows, Linux

Education

- B. Tech - Computer Science and Engineering in Biju Patnaik University of Technology, Odisha, India

Experience

Description:

Southwest Airlines, located in Dallas, Texas, typically referred to as Southwest, is an airline based in the United States and the world's largest low-cost carrier. It is headquartered in Dallas, Texas, and has scheduled service to 121 destinations in the United States and 10 additional countries. It has biggest maintenance system which has different sub-systems

As a software engineer in a maintenance project, my responsibilities include modifying existing software as per the requirement specifications. I responsibilities also include analyzing and fixing any defects that arises in production systems.

Responsibilities:

- Build **REST web services** by building API in the Java Spring backend to handle requests from other interconnected systems.
- Generated codes in several frontend technology languages like JAVA 8, JAVA 11, CSS3, HTML 5 and JavaScript.
- Develop **Oracle** connections from java code using Hibernate and **Spring Data JPA** as an **ORM** to **map class models** to the **Oracle database**.
- Mainly responsible for developing **RESTful API** using **Spring framework and also Spring reactive stack(webflux)**. Developed different **controllers** that return the response in **JSON** format on the request type.
- Integrated 2 different services using AWS **EventBridge** as we slowly were migrating from on premise to cloud friendly system.

Southwest Airlines, Dallas – TX (Client)

Nov 2021 – Oct 2023

Full Stack Java Developer

- Java 8, Java 11
- Spring, Hibernate, Spring REST, Spring Data JPA, Spring batch, Spring integration
- AWS Event Bridge, EC2, Lambda, EBS, S3, IAM
- Angular 10/11/12, node js
- ☑ SOAP, Rest
- Oracle, MongoDB
- Git, Gitlab
- Junit, Mockito
- Kafka, RabbitMQ
- Gradle, Maven

- Develop a batch processing application using spring integration along with spring batch.
- Worked with **Core Java concepts** such as **Multithreading, Building algorithm, Collections, Concurrency** and **Exception Handling** under the **AGILE methodology**.
- Worked in DTO design pattern to format data in form of JSON, xml.
- Use **Kafka, RabbitMQ** messaging to produce and consume messages
- Responsible for write **jUnit** test cases with **Mockito** to test newly developed code.
- Followed the strict patterns of implementing model-view-controller (MVC) architecture using **Angular Framework**. Design and implementation of accessibility features and collaborating with customers up to date.
- Used **Node JS** for the communication to the server through **Restful API** and added user validations & permissions by using it.
- Responsible for **upgrading** one of the applications with a higher version for spring and all other related components.

Responsibilities:

- Involved in development activities using Java oops concepts like polymorphism, inheritance for creating web applications.
- Extensively involved in writing code by using Java Collections like LinkedList, Queues, HashSet, worked on the Java Collections API for handling the data objects between the business layers and the front end.
- Used Java multi-threading to implement batch Jobs with JDK 1.7 and JRE 6 features.
- Wrote complex SQL queries using joins, Stored Procedures, functions, Triggers, cursors, and indexes in a MySQL database.
- Developed Business objects using POJOs and data access layers using JDBC.
- Performed Query tuning to retrieve data from the database.
- Implemented persistence layer between the database and service layers with IBatis ORM.
- Worked with JSF (Jakarta Server Faces) web MVC monolithic framework.
- Wrote stored procedures for reliability and wrote complex queries to extract data from MySQL DB.
- Used JDBC driver to connect with backend Oracle database.
- Performed client-side validations using JavaScript scripting language.

□ IntelliJ

UBN SOFTWARE

Apr 2014- Apr 2016
Java Developer

- **Java Multi-threading**
- **Collections, OOPS, Unix Scripting, JDBC, Ibatis, JavaScript,**
- **Unix, JBoss Server,**
- **MYSQL DB, Stored procedures, Query tuning.**
