Education:

University of Arizona, Tucson, AZ

Bachelor of Science in Astronomy; Minor in Computer Science

Graduated with Magna Cum Laude Honors May 2025, Cumulative GPA: 3.784 / 4.00

Technical Skills:

Programming languages: Python, Java, LaTeX, JavaScript, HTML, CSS

OS / Software: Windows, GitHub, Microsoft Office, VS Code, Spyder, Eclipse, Terminal, Vim

Work Experience:

Capstone Copper - Pinto Valley Mine | IT Intern – May 2022 - June 2022

- Installed software on laptops and facilitated their distribution to employees.
- Provided help desk support

Relevant Projects:

University of Arizona Dept. of Astronomy

ASTR 400B - Theoretical Astrophysics: Final Project – Spring 2025

- Developed a Python program to analyze simulation data and determine if the merging of the Milky Way and M31 tidally transforms M33 using concepts learned in class.
- Participated in code check-ins to support fellow classmates in code debugging and get feedback on code.
- Created a report using LaTeX to convey project processes and results.

University of Arizona Dept. of Computer Science

CSC 335 - Object Oriented Programming and Design: Large Assignments, Final Project – Spring 2025

- Collaborated with a partner (Large Assignments) and a group of people (Final Project) to develop Java programs.
- Utilized Agile methodology to control the workflow process.

University of Arizona Dept. of Physics

PHYS 305 - Computational Physics: Final Project – Fall 2024

- Developed a Python program to determine an apparent horizon of a binary black hole system in two dimensions using a numerical integration technique learned in class.
