

MANI SHANKER

Data Analyst

TX, USA | +1 (940) 290-1762 | vulechems@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience analyzing large datasets to identify trends, patterns, and business insights across financial, mobility, operational, and regulatory domains. Strong SQL proficiency, with hands-on expertise building and maintaining dashboards and reports using Power BI and Tableau. Advanced Excel skills including PivotTables, PivotCharts, XLOOKUP, and Power Query. Proficient in Python (Pandas, NumPy, Matplotlib) for data cleaning, statistical analysis, and reporting automation. Experienced collaborating with cross-functional teams -- business, product, finance, compliance, and engineering stakeholders -- to automate recurring reports, ensure data quality, perform ad hoc analysis, and present findings that support business decisions. Additional exposure to AWS, Azure, ETL, and data warehousing.

TECHNICAL SKILLS

Data Analysis: Exploratory Data Analysis, Trend Analysis, Pattern Identification, Business Insights, Statistical Analysis, Root Cause Analysis, Ad Hoc Analysis, KPI Development, Forecasting, Requirements Gathering, Data Storytelling

SQL & Databases: Advanced SQL, Joins, CTEs, Window Functions, Subqueries, Stored Procedures, Query Optimization, Data Extraction & Manipulation, PostgreSQL, SQL Server, Oracle, MySQL, Snowflake

Business Intelligence: Power BI, Tableau, DAX, Power Query, Data Modeling, Interactive Dashboards & Reports, Drill-Down Reports, Scheduled Refreshes, Row-Level Security

Advanced Excel: PivotTables, PivotCharts, XLOOKUP, VLOOKUP, INDEX-MATCH, Power Pivot, Conditional Formatting, Data Validation, Macros

Python / R Knowledge: Python, Pandas, NumPy, Matplotlib, Data Cleaning, Data Transformation, Statistical Analysis, Reporting Automation

Data Quality & ETL/Data Warehousing: Data Quality, Data Profiling, Data Validation, Data Reconciliation, ETL/ELT, Data Warehousing, Apache Spark, PySpark, Databricks, Azure Data Factory

Cloud Platforms: AWS S3, AWS Athena, Microsoft Azure, Azure Blob Storage, Azure DevOps, Git, Jira, Confluence, ServiceNow

Professional Skills: Cross-Functional Collaboration, Stakeholder Management, Executive Presentations, Agile/Scrum, Documentation, Data Governance

PROFESSIONAL EXPERIENCE

Data Analyst | JP Morgan Chase & Co. | USA

January 2025 - Present

- Analyzed more than 48 million daily trade and transaction records using SQL, Python, Pandas, and Snowflake to identify trends, patterns, operational risks, and business insights across six global trading desks.
- Built and maintained Power BI dashboards and reports containing trade volumes, settlement status, processing latency, exception rates, compliance metrics, and service-level KPIs for more than 300 business, operations, and trading users.
- Wrote complex SQL queries using joins, common table expressions, window functions, aggregations, and subqueries for data extraction and manipulation from PostgreSQL, Snowflake, and AWS Athena.
- Automated recurring daily, weekly, and monthly reports using Python, Pandas, SQL, Power Query, and scheduled Power BI refreshes, reducing manual reporting effort by approximately 80%.
- Performed ad hoc analysis to support business decisions for trading, finance, compliance, and operations teams, investigating transaction failures, settlement delays, and volume fluctuations.
- Created data validation and reconciliation checks across source systems and reporting tables to ensure data quality, identifying incomplete, duplicate, and inconsistent records before dashboard publication.
- Processed approximately 9.4 TB of market data daily through Spark, AWS S3, and Snowflake pipelines, reducing analytical dataset preparation time from three hours to 47 minutes.
- Collaborated with cross-functional teams -- business, compliance, product, and senior leadership -- presenting analytical findings and KPI movements through dashboards and executive-ready reports.

Data Analyst | Uber | USA

August 2024 - December 2024

- Analyzed trip, pricing, geolocation, payment, and marketplace datasets covering 6,400 pricing updates per minute across 18 metropolitan regions to identify demand patterns, trends, and business insights.

- Developed and maintained Tableau and Power BI dashboards and reports for monitoring trip demand, driver availability, pricing changes, rider conversion, cancellation rates, and payment failures.
- Used SQL and Python to analyze approximately 2.9 million daily GPS coordinate records, evaluating rider-driver matching accuracy, regional coverage, and route efficiency.
- Performed ad hoc payment failure analysis using SQL, Advanced Excel PivotTables, and Pandas, helping identify recurring authorization issues affecting approximately 47,000 transactions per month.
- Built reusable Python scripts with Pandas and NumPy to clean, standardize, aggregate, and validate high-volume trip and payment datasets, ensuring data quality for operational reporting.
- Automated weekly marketplace performance reports, consolidating multiple data extracts into standardized, dashboard-ready datasets.
- Partnered with cross-functional teams -- product, operations, engineering, finance, and marketplace -- to define KPIs, analyze business questions, and present findings supporting pricing and dispatch decisions.

Data Analyst | Cognizant | India

January 2021 - December 2022

- Analyzed approximately 1.4 million daily financial transaction records using SQL, Python, Advanced Excel, and Power BI to monitor transaction volumes, processing status, exception rates, and business performance.
- Designed and maintained 18 interactive Power BI dashboards and recurring reports for business, operations, finance, and compliance stakeholders using Power BI, SQL Server, Oracle, and Excel.
- Optimized SQL queries, indexes, joins, and execution plans, reducing report-generation time from 48 minutes to six minutes and improving dashboard performance.
- Developed SQL-based reconciliation reports to ensure data quality across source transactions, downstream processing records, and reporting outputs, identifying missing and mismatched data.
- Integrated and validated approximately 620,000 hourly event records from multiple upstream systems using Kafka data feeds, SQL, and Python-based data-quality rules.
- Automated recurring operational and SLA reports using Python, SQL, Excel PivotTables, and scheduled data refreshes, reducing manual reporting effort for support and business teams.
- Performed root cause and ad hoc analysis to support business decisions on transaction failures, reporting discrepancies, and SLA breaches, coordinating remediation through ServiceNow and Jira.
- Collaborated with cross-functional teams -- business analysts, developers, QA, and client stakeholders -- to gather requirements, validate KPIs, and deliver eight enterprise reporting releases.

Data Analyst | KPMG | India

June 2020 - December 2020

- Analyzed 18 million quarterly financial, regulatory, and compliance records across seven datasets using Python, SQL Server, Power BI, Spark, and Azure to identify trends, risks, and business insights.
- Built and maintained 42 audit-ready Power BI dashboards and reports for five global advisory units, covering compliance exceptions, risk indicators, audit findings, and remediation status.
- Developed Power BI data models, DAX measures, Power Query transformations, calculated columns, drill-through reports, and scheduled refresh workflows.
- Built ETL/data warehousing pipelines using Azure Data Factory, Databricks, PySpark, and Azure Blob Storage to extract, transform, validate, and load data into analytical datasets.
- Improved ETL processing performance by optimizing PySpark transformations, reducing daily data-processing time by 11 hours across four reporting systems.
- Performed data profiling, completeness checks, duplicate analysis, and reconciliation to ensure data quality and reliability of compliance reports.
- Used Advanced Excel, PivotTables, lookup formulas, conditional formatting, and Power Query to support ad hoc analysis and stakeholder reporting.
- Presented dashboard findings to cross-functional stakeholders -- advisory, compliance, audit, and technology teams -- supporting prioritization of regulatory remediation activities.

EDUCATION

Master of Science in Computer and Information Science

Southern Arkansas University, USA | July 2023 - December 2024

Bachelor of Technology in Information Technology

Anurag Group of Institutions, India | August 2016 - June 2020

CERTIFICATIONS

- MySQL Certification - Indian Institute of Technology, India
- Oracle Certified - Java Fundamentals
