

Matthew Pence

Business Analyst | Strategy & Insights Analyst

Dallas, Texas 75204 • mpence40@gmail.com • 918-868-4336

Professional Summary

Results-driven Business Analyst with 3+ years of experience in consulting and technology environments, specializing in stakeholder engagement, cross-functional collaboration, SDLC, business process improvement, system integration, KPI tracking, and data-driven decision making. Proven success using agile tools like Jira and Confluence to deliver strategic insights, enhance operational efficiency, and support monetization and risk mitigation initiatives. Strong interest in analytics within tech-forward industries and emerging business models like the creator economy.

Core Competencies

Business Process Improvement • Product Lifecycle • Requirements Gathering • Stakeholder Alignment • KPI Reporting • Agile Methodology • UAT • SDLC • Data Modeling • Workflow Optimization

Education

University of North Texas – Denton, TX

Bachelor of Business Administration, Business Analytics (GPA: 3.85), May 2020

Bachelor of Business Administration, Entrepreneurship, May 2019

Experience

Gartner Inc.

Dallas, TX (Remote)

Business Analyst

Sep 2023 – April 2024

- Partnered with cross-functional teams to gather business requirement documents (BRD) and functional requirement documents (FRD) using Jira
- Translated business and technology strategies into detailed requirements and deliverables
- Collaborated with Product Owners to define user stories and acceptance criteria aligned with product roadmap and Agile sprint planning
- Streamlined process of reporting system related issues to create process improvements
- Conducted business analysis and KPI reviews to identify inefficiencies, enabling workflow optimization and scalable solutions
- Collaborated with cross-functional teams to understand their goals, document the business requirements, and drive the execution of strategy with internal and external development resources
- Drove execution strategy across internal and external teams to support roadmap milestones

Deloitte Consulting LLP

Dallas, TX (Remote)

Business Analyst

May 2022 – Feb 2024

- Facilitated stakeholder meetings to gather business requirements and translate them into functional specifications across SDLC stages
- Used agile software development tools such as Jira and Selenium to create and track new application bugs by performing functional, integration, regression, and user acceptance testing (UAT) on test scripts
- Developed and deployed 200+ scripts based on specified business requirements to support development and infrastructure teams in validating the functionality and performance of the application for environmental upgrades
- Documented and triaged incidents during UAT and SIT using root cause analysis, improving service delivery efficiency by 40%
- Assisted in management reporting to senior leadership detailing progress, compliance with regulatory requirements/company standards, and gaps in performance

- Delivered technical support, supported with inquiries, resolved problems, and provided software system training for internal consultants and client-side staff
- Conducted validation and user acceptance testing (UAT) to ensure solution alignment with defined business requirements

Monument Realty

Dallas, TX

Senior Consultant

Nov 2021 – Current

- Established trust-based relationships by assisting investors, home builders, and land developers in analyzing information regarding government zoning, expected property value growth, taxes, traffic volume and property growth to help them make decisions about profitable investments
- Prepared non-homeowners in becoming homeowners by providing consultation in down payment requirements, credit ratings, loans, eligibility, and market trends
- Created CMAs and analytical spreadsheets to help clients make informed decisions about market trends, buying, selling, and renting real estate properties
- Cleaned, structured, and analyzed large property datasets to forecast investment performance and identify market trends, directly supporting \$4.0M+ in closed transactions over a 12-month period.
- Led team meetings on market trends, valuation, negotiating, contract writing, and prospecting communication

Josh Deshong Realty

Dallas, TX

Consultant

May 2020 – Nov 2021

- 500+ outbound calls a week creating and tracking data through a CRM software
- Produced sales reports on a monthly and quarterly basis to ensure all sales goals were met
- Managed a positive flow of communication with developers, builders, potential clients, other consultants, buyers, sellers, mortgage officers, inspectors, escrow companies, and appraisers in the home buying process to create a smooth showing to closing process
- Experienced in writing and negotiating the terms of the real estate contracts, as well as understanding inspection reports, and appraisals
- Created an apartment locating transaction process, contracts, and services
- Worked closely with the transaction coordinator to create verification forms, ensure transaction contracts, invoices, and other files were properly completed and in compliance with broker and TREC requirements
