

Maxwell A Crawford

Full Stack Software Engineer

✉ crawfordmaxwell24@gmail.com ☎ 910-294-1329 📍 Southport, NC

🌐 linkedin.com/in/crawford-maxwell 🐙 github.com/Zycient

A skilled engineer that designs, tests, and deploys real-world, enterprise-class applications to clients, while supporting team members and functional systems.

Professional Experience

Sr. React-Redux Full Stack Developer, FidTech Partners, April 2024 - June 2024 (Remote)

- Developed reusable and reliable React components for an administrative portal and accounting platform.
- Utilized Redux and Axios for state and data management.
- Designed and maintained C# .NET Core 8 REST API endpoints.
- Created flexible SQL Server stored procedures and release scripts
- Maintained best practices and clean code with ESLint rules and Jest unit tests.
- Managed remote deployments to several development Azure cloud environments.
- Participated in SCRUM and ensured high-quality agile development with Zoom, BitBucket and Jira solutions.

Programmer II, Brunswick County, November 2021 - May 2023 (Bolivia, NC)

- Built responsive enterprise-level applications and NPM libraries using Angular, React, MUI, and TypeScript.
- Developed RESTful APIs with C#, Entity Framework, Breeze, GraphQL, and FusionAuth security.
- Deployed and managed production environments using Azure DevOps pipelines, IIS, and Remote Desktop.
- Analyzed, sized, and prioritized tasks and tickets with Azure DevOps boards, Bossdisk, and Agile SCRUM PATBoards.
- Assisted customers and mentored team members via Mitel phone systems and Microsoft Teams.
- Used dependency and package control to manage large repositories with Node.js, NPM, Gulp, and Webpack.

Software Developer, Belcan TechServices Inc. (GE Hitachi), April 2020 - July 2020 (Wilmington, NC)

- Used Python, JavaScript, Node.js, and PostgreSQL to deliver high-quality web and database solutions.
- Triaged user stories and bug reports to determine priority level and organize the workflow in SmartSheet.
- Organized group efforts while remote, using tools such as Microsoft Outlook, Word, Skype, Slack, and Zoom.
- Implemented and ran unit, integration, and system tests for RESTful API on MacOS and Windows platforms.
- Maintained high code quality by utilizing GitHub for Enterprise pull requests, and regular code reviews.

Software Engineer, *Belcan TechServices Inc. (GE Hitachi)*, July 2018 - January 2020 (Wilmington, NC)

- Leveraged Python, JavaScript, and Node.js to write and maintain vital sections of a valuable enterprise application.
- Verified and wrote user stories in CA Agile Rally to keep the work organized and up to date.
- Utilized PostgreSQL and SQLAlchemy to produce intelligent queries for performance and data utility.
- Designed multi-tiered web pages with Polymer.js and Node.js, crafted to the GE's Predix UX standard.
- Facilitated application pushes to the live Predix environment, using Cloud Foundry tools and Jenkins CI/CD pipelines.

Education

University of North Carolina at Wilmington,

Computer Science

August 2014 – May 2018

- GPA: 3.7
- Honors & Awards: Summa Cum Laude

Brunswick Community College,

Computer Programming

January 2012 – May 2014

- GPA: 3.5
- Honors & Awards: Dean's List

Skills

Frontend

TypeScript, React, Recoil, Redux, Tailwind, CSS, MUI, Vite, Webpack, Angular, Axios, Node

Backend

C# .NET, SQL Server/PostgreSQL, Entity Framework, SQL Alchemy, Redis, YAML

Tooling

VS Code, Visual Studio, SSMS, Postman

Collaboration

SCRUM, Kanban, PATBoards, Teams, Zoom

Projects

ZDA Website, *React.js, Vite.js, TypeScript, Tailwind, MUI, Redis* 

2024

- Built a responsive SPA with multiple tabs, custom styled components, NoSQL storage, and lean performance to act as a personal portfolio and visual showcase

Glitch Art System, *Python, OpenCV*

2017

- Created a glitch art generator that accepts images and processes them using matrix math and manually created effects.

Interests

Logos and Graphic Design

Abstract Art
