New York, NY • 917-660-9524 • mikhail.karepov@gmail.com • <https://www.linkedin.com/in/mkarepov/>
Fully Work Authorized • No Visa Sponsorship Required

PROFESSIONAL SUMMARY

Data Analyst with over **8 years** of experience transforming complex data into strategic insights that boost organizational performance for:

- **Rambler&Co**, one of the largest digital platforms, with over 40 million monthly users.
- **AZIMUT Hotels**, hotel chain with 40+ properties across Europe and Asia and annual revenue exceeding \$400 million.
- **Luis+**, a leading B2B company in electrical equipment with over \$500M revenue.

KEY ACHIEVEMENTS

- Drove **\$7.2M in additional revenue** by designing and implementing a new compensation model at Luis+, contributing to a total revenue increase of **\$30M** through strategic adjustments in workforce performance incentives.
- Optimized workforce analytics using **Python and SQL** to create **predictive models** at Luis+, which improved employee attrition rate and significantly lowered turnover-related costs.
- Built **advanced data dashboards** in Tableau to streamline decision-making processes at Luis+, enabling **real-time analysis** of operational metrics and providing actionable insights for leadership.
- **Increased operational efficiency** at Rambler&Co by integrating KPI tracking systems with business intelligence tools, leading to more effective alignment of departmental goals and streamlined processes.
- Enhanced process automation at AZIMUT Hotels by deploying **automated workflows** and error-tracking systems, which supported seamless scaling across new locations and reduced manual workload.

Proficient in data management, advanced analytics, and visualization with **Python, SQL, and Tableau**. Authorized to work in the U.S. without visa sponsorship.

PROFESSIONAL EXPERIENCE

PRINCIPAL DATA ANALYST

March 2020 - May 2024

Luis+

B2B wholesale company with \$500M+ annual revenue in electrical equipment and industrial automation solutions.

- **Boosted sales performance by 24% and increased revenue by \$30M** by **analyzing sales data using Python (pandas, numpy) and SQL to restructure the sales employee salary system**, collaborating with Sales, Finance, and HR departments, and conducting over 15 training sessions with sales teams.
- **Enhanced sales strategies and performance by conducting behavioral analysis on over 2 million customer transactions using Python and SQL**, identifying trends and insights that informed data-driven decisions.
- **Reduced employee turnover by 12%** by **implementing predictive attrition models using Python (scikit-learn)**, enabling proactive retention strategies through accurate employee turnover predictions.
- **Improved data accessibility and decision-making efficiency by 15%** by **automating weekly operational dashboards using Tableau**, mentoring team members in dashboard creation, reducing manual work by 16 hours per week, eliminating data errors, and training over 20 department heads on dashboard utilization.
- **Enhanced decision-making efficiency by collaborating cross-functionally with Sales (200+ team members) on compensation modeling, Finance on budget forecasting, and Leadership on strategic planning**, utilizing data analytics tools like Python and SQL to provide actionable insights.
- **Optimized data analysis processes by enhancing the technical stack with Python (pandas, numpy, matplotlib) and SQL (complex queries, data modeling)**, increasing data processing efficiency and improving overall data management.

SENIOR DATA ANALYST

October 2017 - September 2019

Rambler&Co

Leading digital media company with 40M+ monthly active users across multiple platforms.

- **Achieved \$5 million in annual cost savings** through workforce optimization by **defining and implementing ERP system KPIs using Python and SQL data analysis tools**; collaborated with executive leadership on strategic alignment.
- **Drove adoption of internal ERP systems across 500+ users by developing an analytics framework using Python (pandas) and SQL** that informed **three major feature releases**.
- **Generated \$3M in annual savings by streamlining budgeting processes** through Excel and SQL data analysis; managed a three-person project team to implement improvements and standardize reporting.
- **Delivered \$0.5M in savings** in recruitment and training costs by **restructuring compensation models for 200+ employees** through **data analysis**; mentored junior team members in analytical techniques.
- **Transformed organizational performance monitoring across business units by developing a Python and SQL-based employee engagement system** measuring over **20 key metrics**, enabling data-driven strategic initiatives and ERP feature optimization.

DATA ANALYST

August 2013 - September 2017

AZIMUT Hotels

International hospitality group with 40+ properties, 2M+ annual guests, and \$400M+ revenue

- **Generated \$0.9 million in annual savings by optimizing operational productivity through standardizing processes and implementing them across new locations using Excel and SQL for data analysis**; trained over **20 team members**.
- **Delivered \$0.7 million in savings** in recruitment and training costs by **analyzing employee performance and compensation data using advanced Excel functions and SQL**, providing data-driven recommendations that influenced senior leadership's strategic decisions.
- **Accelerated strategic decision-making processes for senior management by conducting thorough data analysis and generating comprehensive reports using advanced Excel features**, enhancing the speed and quality of executive decisions.
- **Saved 150 team hours monthly by reducing report generation time from 6 hours to 1 hour for over 30 end users, by using SQL and data integration tools**, collaborating with IT to implement automated data pipelines

EDUCATION

Master of Science in Accounting and Auditing, Moscow State University of Economics, Statistics, and Informatics

PROFESSIONAL DEVELOPMENT

Data Science Certification, TripleTen, New York, NY

Ongoing

Advanced SQL and Python programming, Statistical analysis and data visualization, Machine learning fundamentals

Data Science Certificate, Cornell University, New York, NY

March 2025

Data modeling and machine learning with R, clustering, regression, classification, and neural networks using real-world datasets

Alteryx Designer Core Certification, Alteryx

September 2024

Data Analysis Certification, SAM Consulting, New York, NY

June 2024

Predictive modeling and statistical analysis, Data visualization and reporting, Business intelligence solutions

COMMUNITY LEADERSHIP

Service Corp Consultant - Project Manager, NYC Net Impact, New York, NY

- **Improved nonprofit project outcomes** by **developing data-driven solutions**, collaborating with cross-functional teams to address social impact challenges
- **Implemented project management methodologies** by coordinating a team of 5 volunteers to meet tight deadlines.

Volunteer, New York Cares, New York, NY

- Engaged in community service projects, demonstrating leadership and collaborative skills.
- Coordinated with team members to plan and execute volunteer events, improving community outreach and impact.
- **Recipient of the Presidential Volunteer Service Award**, recognizing dedication and commitment to community service.

EXECUTIVE STRENGTHS

Advanced Analytics: Expertise in statistical analysis, predictive modeling, and data-driven decision making using Python, R, SQL, and Alteryx

Data Visualization: Strong capability in transforming complex datasets into actionable insights through interactive dashboards and reports

Strategic Problem Solving: Proven track record of identifying business opportunities through data analysis and implementing solutions that drive measurable results

Technical Leadership: Experience in leading data-focused projects and mentoring junior analysts in advanced analytical techniques

Stakeholder Communication: Skilled in presenting complex technical findings to diverse audiences and translating data insights into business recommendations

TECHNICAL SKILLS

Data Analysis & Programming: Python (pandas, numpy, matplotlib, scikit-learn), SQL (complex queries, data modeling, optimization), Alteryx (workflow automation)

Data Visualization & BI: Tableau (interactive dashboards, advanced visualizations, report automation)

Analytics & Machine Learning: Statistical analysis and hypothesis testing, Predictive modeling and classification, Time series analysis and forecasting, A/B testing and experiment design

Development Tools: VS Code, Git, Jupyter Notebooks, Docker basics, AWS/Cloud computing fundamentals
