Urbana, IL, United States | (217)418-3370 | muskanshivnani99@gmail.com | [linkedin.com/in/muskan-shivnani-4406671a5/](https://www.linkedin.com/in/muskan-shivnani-4406671a5/)

SUMMARY

Software Engineer (backend developer) with 3.5+ years of experience in Java, Spring Boot microservices, distributed systems, and fintech applications. Skilled in building scalable REST APIs, integrating third-party services, and deploying cloud-native solutions. Currently pursuing a Master of Computer Science at UIUC (graduating May 2026) and seeking opportunities to contribute to backend or full-stack engineering teams solving complex, large-scale problems.

EDUCATION

University of Illinois at Urbana-Champaign, *United States*

Jan 2025 – May 2026

Master of Computer Science | CGPA – 3.59 / 4

Relevant coursework: Software Engineering, Artificial Intelligence, Formal Software Development Methods

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Persistent Systems | Pune, India

May 2023 - Dec 2024

- Designed and implemented 25+ scalable, low-latency REST APIs using Java and Spring Boot microservices, enabling seamless digital savings account onboarding and transaction processing.
- Developed Central Know Your Customer (CKYC) integration to streamline customer onboarding and verification, reducing manual effort by 60% and accelerating compliance checks across the application.
- Integrated Passport Optical Character Recognition via a third-party API, improving document verification accuracy by 40%.
- Engineered Redis-based rate limiting with sliding window algorithm to ensure fair API usage.
- Generated 3+ scheduled reports that improved operational visibility by 70%, facilitating timely data-driven decision-making.
- Managed secure cloud document handling with AWS S3 and DMS, ensuring 99.9% availability and high redundancy for secure and reliable document handling.
- Led and mentored 5 junior developers through code reviews and technical guidance.

Software Engineer, Persistent Systems | Pune, India

May 2021 - May 2023

- Managed and optimized MySQL queries on datasets with 10,000+ records, reducing latency by 35%.
- Executed 300+ unit and API tests using JUnit and Postman, achieving over 90% code coverage and ensuring seamless service functionality and high code quality before deployment.
- Maintained clear API documentation and dev workflows aligned with Agile/JIRA standards.
- Used Jaeger and ELK stack for distributed tracing, logging, and monitoring, reducing issue resolution time by 80% and improving system reliability.
- Implemented CI/CD pipelines using GoCD, accelerating deployment cycles and streamlining the overall development workflow.

Quality Assurance Intern, Atkins Realis | Bangalore, India

June 2019 - Aug 2019

- Performed comprehensive manual testing, including regression, functional, system integration, smoke and user acceptance testing, ensuring 98% system stability and on-time release readiness.
- Recognized with the Spot Award for significant contributions to successful product delivery.

TECHNICAL SKILLS

- Languages & Frameworks:** Java, Spring Boot, RESTful APIs, Microservices, Object-Oriented Programming (OOP), Python, Redis, JUnit
- Tools:** Kafka, Git, Gradle, AWS S3, CI/CD, JIRA, Natural Language Processing (NLP), MySQL, Oracle SQL, Jaeger, Elasticsearch, AndroidStudio
- Methodologies:** Fintech, Agile, OOP

PROJECTS

- IDFC First Customer Acquisition App:** Led backend development from inception to production using Spring Boot microservices and designed onboarding APIs and services for seamless integration across web and mobile. Worked closely with QA engineers and product managers to deliver banking features into production with high quality and compliance.
- Real-time Stock Price Prediction:** Employed sentiment analysis and supervised machine learning principles to the tweets extracted from twitter to examine the correlation between a company's stock market movements and sentiments expressed in tweets.

LEADERSHIP & MENTORING

- Course Assistant (Software Design Lab):** Mentored 2 teams at UIUC through a full-stack project, providing guidance on architectural decisions, design patterns, and best practices in software development.
- Computer Teacher:** Served as a part-time faculty at a coaching institute for 5 years, taught Java to 10th-grade students, and authored "*Knowing It Your Way*" - a beginner-friendly guide to core Java concepts.
- Dance Instructor:** Led and choreographed dance sessions as an instructor, mentoring students in group settings; contributed to organizing large-scale events with 200+ performers, demonstrating strong leadership, coordination, and team management skills.
