Education

- M.S in Computer Science, Seattle University Seattle, WA Sept 2023 - June 2025
- B. E in Computer Science, Dr. Ambedkar Institute of Technology Bengaluru, India Aug 2014 - June 2018

Skills

- Programming Languages:** Java, Python, TypeScript, JavaScript, HTML/CSS.
- Mobile Development:** Flutter, Dart, Firebase, Express JS, Spring Boot, ReactJS, Angular10.
- Tools:** Linux, Node.js, MongoDB, Oracle SQL, Git, Azure, AWS, JIRA, Junit, Mockito, Docker, Kubernetes.
- Methodologies:** Test-Driven Development (TDD), Object-Oriented Programming (OOP), Agile Methodology, Pair Programming, CI/CD Pipeline, Cross-Platform Application Development.

Experience

Lumen Technologies - Software Development Engineer

Bengaluru, India Nov 2020 - July 2022

- Architected Java, Spring Boot microservices deployed on AWS, integrating with React and Node.js frontends, serving 10,000 daily tasks across fiber, DSL, and Ethernet services.
- Automated field engineer dispatching by integrating with external systems over RESTful APIs, increasing system throughput by 35% reducing response times from 2 seconds to 500 milliseconds.
- Optimized SQL queries and stored procedures, improving data processing speed by 25% in SQL databases.
- Designed responsive web pages using HTML5, CSS3 and TypeScript, with improved user experience.
- Owned full SDLC phases including backlog refinement, design, implementation, testing, CI/CD setup, and production support, ensuring performance, scalability, and security requirements were met.
- Led peer code reviews and implemented monitoring strategies, reducing post-deployment defects by 25%.

Birlasoft - Backend Developer

Chennai, India Sept 2018 - Oct 2020

- Developed financial platforms using JavaScript, Express.js & Node.js, achieving application stability by 40%.
- Introduced GraphQL APIs, decreasing response times by 25% for high-frequency transactions.
- Implemented unit and integration testing with JUnit and Mockito, improving code coverage by 35%.
- Collaborated across teams with Git and JIRA, ensuring agile delivery and documentation transparency.

Projects

Finance Tracker Single Page Application

Jan 2025 - March 2025

- Designed and developed a budgeting platform with 10+ features using TypeScript, Node.js, Angular, Express.js, and MongoDB, enabling users to visualize and track expenses effectively.
- Integrated Google SSO for secure & seamless authentication, simulating application security best practices.
- Used DBT for SQL transformation layers and built reporting interfaces.
- Configured CI/CD pipelines using Github Actions and Kubernetes, streamlining the deployment process and demonstrating best practices in DevOps.
- Delivered 45%+ test coverage with unit and integration tests, reducing potential defects and improving the reliability of the application.

Hiker Connect

Sept 2024 - Dec 2024

- Led development of React native application for 1K+ users to create profiles, plan events, and connect.
- Optimized MVVM architecture using Provider for efficient state management, reducing load times by 40%.
- Integrated Firebase Authentication and Firestore with <1s latency for real-time updates.

Scalable Societal Simulation Distributed Systems

Jan 2024 - March 2024

- Built distributed models scaling to 1,000+ nodes, reducing runtime by 60% through scheduling and storage optimization.

AI-Based Path Optimization in Grid Environments

Sept 2023- Dec 2023

- Devised DFS, BFS, A*, Bayes Nets, and Q-Learning for game AI and Increased agents win rates by 30%.
