

Noah Diez

Address: 311 Greenview Drive, Brandon, Florida, United States | Phone: 813 -716-3698 | Email: nd1493914@gmail.com

OBJECTIVE

To obtain an entry-level full-time position in the Computer Science field or related discipline.

EDUCATION

Bachelor of Science in Computer Science

University of South Florida

December 2024

Tampa, Florida

Key Coursework: Data Structures, Software Engineering, Program Design, Database Design, Analysis of Algorithms

SKILLS

Programming Languages:	Python, Java, C, C++, SQL
Environments and Technologies:	Visual Studio Code, Postgres, Git, Jira, Windows OS, Ubuntu, Excel
Other:	Agile Software Development Methodologies, Scrum, REST

PROJECTS

Instant Messaging Web API

- Developed the backend for an instant messaging application in Java with a test-driven-development (TDD) approach
- Utilized knowledge of object-oriented programming (OOP) concepts, the Javalin web framework, Java Database Connectivity (JDBC), and REST APIs to implement each component of a model-view-controller (MVC) architecture, ensuring a modular connection to an H2 relational database management system (RDBMS)
- Developed an alternative version of this project leveraging the Spring framework, Spring Boot, and Spring JPA for a readily scalable and maintainable application

InCollege Application

- Collaborated as a Scrum Master, Developer, and Tester within a five-person team to deliver a simulation of a social networking platform structured similarly to LinkedIn with a minimal user interface from the ground up in Python
- Utilized proven knowledge of the Scrum Agile framework methodology to contribute incremental software changes to the application's front-end within week-long sprints to conform to user story requirements
- Managed version control in a GitHub repository to maintain a clean, consistent codebase

Digital Image Processor

- Engineered a complete C++ program from the ground up to perform image manipulation functions on images the user specifies
- Utilized OOP concepts to develop and optimize custom image processing functions that can perform Hough transformations, histogram equalization, and image rotation on user-specified images
- Integrated and leveraged the OpenCV C++ library, extending functionality to include further image and QR code reading to the user

WORK EXPERIENCE

Retail Associate, Dollar Tree, Brandon, Florida

March 2021 to present

- Delivered consistent, high-quality service and assistance to customers and co-workers
- Seamlessly processed customer transactions at a point-of sale (POS) machine, increasing throughput by 80%
- Troubleshoot and resolved system errors and connectivity issues, ensuring uninterrupted store operations

HONORS AND AWARDS

Florida Bright Futures Scholarship

August 2019 to December 2024
