

## Professional Experiences

---

### NYC Housing Development Corporation

New York, NY

Data Analyst Intern

June 2024-August 2025

- Assisting the Director of Data Management in the administration of HDC's rent roll submission process through data collection, automation, documentation, and database management all in order to inform the corporation's portfolio and market surveillance efforts.
- Utilizing tools such as R, SQL, Power BI, and Excel to help execute data extraction, cleaning, tabulation, manipulation, visualization, and reports for quarterly rent rolls and other projects as needed in order to better understand various aspects of HDC's real estate portfolio to help inform housing policy.
- Providing technical support to users submitting rent rolls; troubleshooting and solving permission contact issues, and data quality challenges.

### NYC Economic Development Corporation

New York, NY

Economic Research and Policy Analyst Intern

June 2023-August 2023

- Used R to pull data from an API containing information on every storefront within the city, and proceeded to use R to clean, map, analyze, and present the database for the research team in a way that they will be able to easily utilize it for future purposes.
- Utilized R and Excel to aggregate and analyze Quarterly Census of Employment and Wages data around small businesses which has helped another team figure out what initiatives they might implement to help different demographics of workers and business owners within the city based on my findings.
- Using Excel, I performed an occupational analysis of a dataset containing job demographics in New York City where I identified opportunity employment jobs within the education sector which could help those who are undereducated in the workforce be able to get higher paying jobs.
- Conducted literature reviews and market research to help aid the research team in understanding numerous industry sector changes pre and post COVID-19.

### NYC Department of Citywide Administrative Services

New York, NY

IT Business Analyst Intern

March 2022-May 2022

- Utilized the SQL server environment to query data in order to aid in the process of migrating the organization's data from one database to another.
- Utilized SQL and ArcGis pro to clean, map, and analyze real estate leasing data in the current database.
- Used Power BI to help the IT business support team present our findings to stakeholders in a concise and clear manner.

### NYC Department of Housing Preservation & Development

New York, NY

Policy Research Analyst Intern

July 2021-December 2021

- Researched and supported the program implementation of the Shared Equity Initiative, Community Land Trusts Initiative, and Homeowner Help Desk through note-taking during meetings, summarizing legal documents, writing memos, conducting literature reviews, and assisting with the development of financial models using Excel for various housing programs and projects that fell under 421-a that would help to provide more affordable housing options to thousands of new yorkers.
- Conducted research on the effect of different affordable housing models on neighborhood market prices and utilized Python, SQL, and Power BI to clean and model the data used for the research project which will aid the policy team in future decision making regarding which policies to push for when it comes to utilizing different affordable housing models.
- Supported the development of a displacement risk index through literature review, mapping, and analysis using R.
