

Raghavendra Konanki | Business Analyst

Illinois, USA | raghavendrakonanki4072@gmail.com | +1 (224)453-0550 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Business Analyst with 4+ years of experience delivering data-driven solutions across healthcare and financial domains, specializing in requirements gathering, process optimization, and analytics-driven decision-making. Proven expertise in translating complex business requirements into BRDs, FRDs, and user stories while collaborating with cross-functional stakeholders in Agile environments. Strong background in healthcare analytics, including claims, EHR, population health data, and KPI development such as MLR, HEDIS, STAR ratings, and utilization metrics. Skilled in SQL, Python, Snowflake, Azure, ETL validation, data modeling, and developing scalable BI dashboards using Tableau and Power BI. Experienced in API integrations (FHIR, HL7, REST/SOAP) and ensuring regulatory compliance with HIPAA and KYC/AML standards to maintain data integrity, interoperability, and governance.

TECHNICAL SKILLS:

Business Analysis & Documentation:	BRD, FRD/FSD, User Stories, Acceptance Criteria, Gap Analysis, RCA, BPMN, UML, As-Is/To-Be Process Modeling, NFR Documentation, Confluence
Data Analysis & Analytics:	Healthcare Claims Analysis, EHR Data Analysis, Cohort & Trend Analysis, Risk Segmentation, KPI Definition (MLR, HEDIS, STAR, LOS), Financial Forecasting, Data Reconciliation, Fraud/Risk Analytics
Data Engineering & Warehousing:	ETL/ELT Validation, Data Mapping, Data Modeling, Data Quality & Validation Rules, Azure Data Factory, Azure Synapse, ADLS, DBT, Snowflake, Databricks SQL
Business Intelligence & Reporting:	Tableau, Power BI, Qlik Sense, Excel VBA & Macros, Power Pivot, Power Query, Advanced Excel Financial Modeling, Executive Dashboards, Visualization for Financial & Operational KPIs
Programming & Querying:	Python (Pandas, NumPy), SAS, SQL, PostgreSQL
BI & Visualization:	Tableau, Looker, Power BI, DAX, Executive Dashboards, Drill-down Analytics
Healthcare & Financial Domain:	ICD-10, CPT, HCPCS, Claims Processing, Utilization Management, Population Health, Care Management, KYC, AML, RBI Compliance, Loan Lifecycle, NPA Analysis
API & Integration:	REST, SOAP, FHIR, HL7, Postman, Swagger, API Testing & Payload Validation
Tools & Platforms:	JIRA, Azure DevOps, MS Visio, Lucidchart, Excel (Power Query, Macros), CRM Systems
Agile & Project Delivery:	Agile/Scrum, Sprint Planning, Backlog Grooming, UAT, Stakeholder Management, Cross-functional Coordination
Data Governance & Compliance:	HIPAA, PHI Handling, Data Governance, Audit Trails, Access Control, vRegulatory Compliance
Soft Skills:	Stakeholder Communication, Analytical Thinking, Problem Solving, Critical Thinking, Attention to Detail, Decision Making, Collaboration
Operating Systems:	Windows, Linux, macOS

PROFESSIONAL EXPERIENCE:

Business Analyst | UnitedHealth Group – IL, USA | June 2024 – Present

- Collaborated with clinical, operations, finance, and IT stakeholders to gather business requirements and deliver enterprise healthcare analytics solutions supporting claims, utilization management, care management, population health, HEDIS, and STAR reporting.
- Authored BRDs, FRDs, user stories, acceptance criteria, process flows, and gap analyses while facilitating Agile ceremonies, backlog management, and cross-functional delivery using JIRA and Azure DevOps.
- Analyzed claims, enrollment, provider, and EHR data; applied ICD-10, CPT, and HCPCS coding standards to define business rules, KPIs, and reporting logic for cost, utilization, MLR, LOS, and quality performance metrics.
- Partnered with data engineering teams to design, validate, and optimize ETL/ELT pipelines and reporting layers using Azure Data Factory, Azure Synapse, ADLS, DBT, Snowflake, and Databricks, improving data quality and consistency across enterprise dashboards.
- Developed executive and operational dashboards in Tableau and Looker, leveraging Python (Pandas, NumPy) and SAS for trend analysis, cohort studies, risk segmentation, and healthcare utilization insights.
- Supported healthcare interoperability and data governance initiatives by validating FHIR/HL7 integrations, REST APIs using Postman and Swagger, and implementing source-to-target reconciliation controls that improved data accuracy by 22% while ensuring HIPAA compliance.

Business Analyst | Cognizant – India | January 2021 – July 2023

- Gathered, analyzed, and documented business requirements, BRDs, FSDs, user stories, acceptance criteria, and non-functional requirements for consumer finance origination and lending platform enhancements using Agile methodologies, JIRA, and Confluence.
- Conducted root cause analysis, gap analysis, and business process reengineering (BPR) initiatives, creating As-Is and To-Be process flows in Visio and Lucidchart to optimize loan origination, disbursement, collections, and operational efficiency.
- Defined and validated REST/SOAP API integrations between CRM platforms, payment gateways, digital wallets, and UPI ecosystems while implementing automated KYC/AML workflows aligned with RBI regulatory requirements, improving application processing volume by 22%.
- Developed financial forecasting models, automated reconciliation processes, and data validation frameworks using Python (Pandas, NumPy), PostgreSQL, and advanced Excel tools to ensure transactional accuracy and support revenue analysis.
- Collaborated with data and engineering teams on ETL mapping, legacy data migration, and data warehousing initiatives, ensuring seamless migration of consumer financial records with zero data loss and high data integrity.
- Designed executive-level Power BI dashboards and risk analytics solutions to monitor loan portfolio performance, collection efficiency, fraud trends, and regional risk exposure, contributing to a 15% reduction in non-performing assets (NPAs).

EDUCATION:

Master of Business Administration - DePaul University, Chicago, IL, USA

Bachelor of Business Administration - Presidency University, Bengaluru, India
