

MANI SANDESH GANDRA

QA Engineer | Automation & Mainframe Specialist | Immediate Joiner

New Jersey, USA | +1 (201) 706-0037 | manisandesg@gmail.com |
<https://www.linkedin.com/in/mani-sandesh-gandra-b13b96201>

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience in test automation, API validation, and CI/CD integration within Agile environments. Proficient in Playwright (TypeScript) for UI automation and Postman for API testing, with practical experience building and executing automated test suites across complex enterprise web applications. Currently contributing to Workers' Compensation regulatory compliance testing for Cigna Healthcare within a PBM environment, involving HHS-mandated field length expansions across multiple COBOL programs on the Stratus mainframe. Familiar with Azure DevOps and CI/CD pipelines, with a strong focus on integrating automated tests into build and deployment workflows. Detail oriented problem solver committed to improving test coverage, stability, and overall software quality.

PROFESSIONAL EXPERIENCE

Magnit — QA Engineer

New Jersey, USA | July 2025 – Present

- Contributing to the Workers' Comp F6 regulatory compliance project for Cigna Healthcare within a PBM environment, involving HHS-mandated field length expansions across multiple COBOL programs on the Stratus mainframe. Tested and validated COBOL programs following developer field expansions and recompilations, verifying business logic, data processing accuracy, and end-to-end data flow compliance with updated HHS regulatory field requirements.
- Leveraged GitHub Copilot within VS Code to assist in analyzing and understanding COBOL programs during mainframe testing, improving testing accuracy and efficiency.
- Developed and executed automated UI test scripts using Playwright (TypeScript) on the MyMatrixx web application, improving regression coverage and reducing manual testing effort.
- Executed and validated API test collections using Postman to verify data accuracy, response integrity, and backend workflows across multiple service endpoints.
- Utilized PostgreSQL for backend data validation of UI workflows and Stratus DBQ queries for mainframe data validation, ensuring data consistency and integrity across all application layers.
- Designed and executed functional, regression, smoke, integration, and end-to-end test strategies ensuring comprehensive coverage across systems.
- Collaborated with development and product teams in an Agile/Scrum environment to assess change impacts, integrate tests into CI/CD pipelines, and ensure release readiness.
- Utilized JIRA and Zephyr for test case management, regression tracking, sprint planning support, and defect lifecycle management.
- Continuously improved test coverage and stability by optimizing test cases and identifying areas for automation adoption across the QA process.

Wipro Technologies — Project Engineer

India | April 2022 – June 2023

- Led regression testing initiatives within the Skype for Business ecosystem, ensuring stability of legacy and newly released features.
- Created hybrid testing environments by deploying virtual machines and publishing infrastructure blueprints to simulate production scenarios.
- Executed manual and automated UI testing across dynamic application components, validating cross-platform functionality.
- Performed patch, unpatch, and hotfix validation to confirm system integrity during incremental updates and rollbacks.
- Conducted end-to-end sanity testing post-deployment to validate integrated communication workflows.

- Collaborated with developers, DevOps, and QA stakeholders to simulate real-world user scenarios and proactively detect defects.
- Maintained detailed QA documentation, test logs, and defect reports to improve SDLC visibility and traceability.

PROJECTS

- Image Super Resolution with GPT — Implemented deep learning models (ESPCNN, RCAN, SRGAN) and evaluated performance using PSNR and SSIM metrics.
- Reservation and Statistics System — Built a full-stack event management platform using PHP and MySQL with role-based access control.
- Food Waste Reduction Planner — Designed high-fidelity Figma prototypes focused on usability and intuitive navigation.

EDUCATION

Montclair State University — Master's in Computer Science

New Jersey, USA | Aug 2023 – May 2025 | GPA: 3.6 / 4.0

GITAM University — Bachelor of Technology

India | Jun 2018 – Apr 2022 | GPA: 7.56 / 10

SKILLS

Testing & QA: Manual Testing, Automation Testing, Regression Testing, Functional Testing, Smoke Testing, API Testing, Integration Testing, End-to-End Testing, UI Testing, UAT, Mainframe Testing, COBOL Program Testing, Patch/Hotfix Validation

Automation & Tools: Playwright (TypeScript), Cucumber, Postman, Selenium (Exposure), JIRA, Zephyr

AI & Developer Tools: GitHub Copilot, VS Code

CI/CD & DevOps: Azure DevOps, Azure CI/CD Pipelines, Linux CLI

Cloud: Microsoft Azure (VMs, Storage, Azure SQL, Networking)

Domain Knowledge: Workers' Compensation, PBM (Pharmacy Benefit Management), Regulatory Compliance Testing

Programming: Java, TypeScript, Swift

Databases: PostgreSQL, Stratus DBQ

UI/UX & Design: Figma, Wireframing, Prototyping

Methodologies: Agile, Scrum, SDLC, Defect Lifecycle Management
