Summary

Business Analyst with experience in building and maintaining CRM data pipelines to improve the accuracy and efficiency of sales reporting. Skilled in Python and Excel for data validation and analysis, with a strong track record of identifying business opportunities and supporting customer growth.

Work Experience

North Inc.

Account Manager/Corporate Trainer • St. Louis, MO

02/2025 - 01/2026

- Increased data integrity by 18% by automating quality checks and validation protocols for 200+ weekly sales and customer activity records sourced from SAP and Excel.
- Accelerated revenue generation by serving as the primary AT&T point of contact, identifying high-value business opportunities, and delivering solutions to drive customer acquisition.
- Developed standardized data pipelines and mentored new team members on CRM tools, reducing manual processing time and ensuring continuity of business growth objectives.

Applica Solutions Int'l

AI Data Analyst Intern • Boston, MA

01/2025 - 06/2025

- Conducted end-to-end user behavior analytics on 15,000+ recordsets using Python and SQL; built 15+ multi-dimensional visualizations and delivered actionable insights that supported data-driven marketing strategy and helped secure external partnership deals.
- Collaborated with engineering teams to design real-time, interactive dashboards and implemented data-preprocessing logic for scalable user data; enhanced customer service performance by integrating API-based NLP sentiment analysis across 1,000+ call transcripts to support performance evaluation and feedback.

Growbie

AI Chatbot Developer • Waltham, MA

05/2024 - 09/2024

- Built and launched an AI chatbot using Python and Voiceflow to automate client user interactions, improving networking efficiency and workflow scalability.
- Converted business needs into NLP-driven functionality through cross-functional collaboration, increasing response accuracy and overall user satisfaction.
