## EDUCATION

**CUNY - Baruch College**  
Master's, Information Systems

**August 2022 - June 2024**  
GPA: 3.7

**CUNY - New York City College of Technology**  
Bachelor's, Computer Systems

**August 2018 - June 2022**  
GPA: 3.5

## PROFESSIONAL EXPERIENCE

**NYC Department of Youth & Community Development**  
Software Engineer

**New York, NY, USA**  
July 2024 - Present

- Reduced costs by 20% by optimizing data collection in Google's Places API and minimizing geocoding calls
- Utilized geoClient API census tract data to accurately pinpoint and analyze high-poverty regions
- Improved web accessibility by modifying project to adhere to web standards, utilizing WAVE Evaluation Tool and Microsoft Narrator for testing
- Modifying complex database stored procedures and implemented SMTP-based email templates for our email automation system
- Developing and maintaining HTTP/JSON API endpoints, implementing data retrieval and integration with service layer business logic
- Continuously developing feature branches in Azure DevOps, leveraging a CI/CD pipeline for automated builds and deployments, and utilizing Azure Web Jobs for automated tasks

**CUNY - Baruch College**  
Teacher Assistant

**New York, NY, USA**  
August 2023 - December 2023

- Assisted faculty in monitoring and grading discussion boards, assignments, and exams
- Facilitated online DBMS and big data technology classes
- Collaborated with faculty in answering and providing feedback to student inquiries via email

**Geaux Network**  
Full Stack Developer

**Norwood, MA, USA**  
December 2022 - June 2023

- Integrated a dynamic avatar selection feature, allowing users to select their profile picture from a list retrieved from Firebase
- Implemented a user authentication system that streamlined the signup process enabling users to securely sign in using their phone number
- Collaborated with team members engaging in discussions to find effective solutions and to enhance the overall UI/UX of the platform

**Amerikids Productions**  
Game Developer Intern

**New York, NY, USA**  
February 2022 - April 2022

- Led the development of a prototype game utilizing UE5's framework and blueprints
- Implemented a gameplay mechanic that enabled the user to pilot a flying vehicle and a way for the user to interact with NPC's
- Developed UML diagrams discussing the story line and ensuring smooth game flow

## PROJECTS & OUTSIDE EXPERIENCE

### DisChat

- Developed a social media platform equipped with a user authentication system where users are able to communicate with each other

### Credit Card Management System

- A client/server application was developed to enable clients to perform CRUD operations on their credit card accounts.
- Windows Forms were utilized for the front-end and the back-end was built using C# ASP.NET.
- The database was built using Microsoft SQL Server, with the help of an ER Model, a Logical Model, a Data Dictionary, and a Physical Schema Diagram.

### Discord Chat Bot

- Created a chat-bot on Node.js using the Discord.js library to toggle user permission roles and stream audio through voice channels, helping in server management and general entertainment

## SKILLS

**Skills:** Node.js, Agile, Figma, Jest, jQuery, Jupyter, Git, Java, MongoDB, MySQL, Oracle, SCRUM, Python, Web Development, Wordpress, JavaScript, React.js, HTML/CSS, TypeScript, C++, C#, Scss, W3.CSS, Tailwind, Spring Boot, Firebase, Microsoft SQL Server Management Studio, SQL, Excel/Numbers/Sheets, Angular, ASP.NET, MVC Architecture
