Professional Summary

- 3 years of IT Experience in Database Design, Development and business Intelligence of Microsoft SQL Server BI.
- Experience in Power BI and Azure.
- Responsible for creating Databases, Tables, Cluster/Non-Cluster Index, Unique/Check Constraints, Views.
- Experience in writing T-SQL Queries, Stored Procedures, Functions, Joins etc.
- Defined Check Constraints, functions, indexes and views.
- Created and modified complex TSQL batches/stored procedures.
- Provided quick solution to Azure teams for self-servicing data maintenance operations, which uses SQL Master Data Services. Configured and set up SQL Server Master Data Services (MDS) for self-serving data maintenance across different teams.
- Used SQL Azure extensively for database needs in various applications.
- Quick learner and good performer both in team and independent job environments.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

SQL Developer

Nyros Technologies

February 2022 to June 2023

Responsibilities:

- Wrote SQL Queries, Stored Procedures, Triggers, Views, and Indexes using DDL, DML commands and user defined functions to implement the business logic.
- Involved in migration on SQL Server 2012 databases to SQL Server 2014.
- Responsible for Performance tuning the queries, stored procedures and tables by using SQL Profiler, Execution Plans and Index Tuning Wizard to improve entire framework performance.
- Performed Normalization and De-Normalization on existing tables for faster query results.
- Wrote T-SQL queries and procedures to generate DML scripts that modified database objects dynamically based on inputs.
- Created SSIS package to import and export data from various CSV files, Flat files, Excel Spread Sheets and SQL Server.
- Designed and developed different types of reports like Matrix, Tabular, Chart reports using SSRS.
- Scheduling Jobs and Alerting using SQL Server Agent.
- Worked on estimation and sizing for the applications that need to be migrated on Azure.
- Improved application performance using Azure Search and SQL Query optimization.
- Implemented Azure application performance Insights to store user activities and error logging.

- Maintained positive communication and working relationships with all business levels.

SQL/Power BI Developer

Company: Nyros Technologies

May 2020 to January 2022

Responsibilities:

- Work closely with management and end-users to create and evaluate business requirements.
- Created Store Procedures, Functions, Indexes, Tables, Views and other T-SQL code and SQL Joins for applications.
- Creating tables to convert the transactional data to the source fact tables for

Power BI visualization using SQL joins, pivot and Group by.

- Created dashboards according to user specifications and prepared documents to provide an understandable and helpful vision to users.
- Assisted users in creating and modifying worksheets and visualizations dashboards.
- Build Power Bi visuals like line and clustered column charts, line charts, donut charts, cards and table visuals using self-created source tables.
- Writing DAX for creating measures in Power BI.
- Worked closely with business power users to create reports or dashboards using

Tableau desktop.

- Publishing pbix file on Power services and scheduling and managing the scheduled refreshers for the dashboards.
- Worked close with the UI/UX team integrate the Power BI visuals to an internal dashboard.
- Involved in weekly meetings with the stake holders to closely understand the requirements/expectations.

Education

Computer Applications (Master of Computer Applications)

Kakinada Institute of Engineering and Technology (K.I.E.T) College

2012

Bachelor's degree

Skills

Teamwork	2014	Data analysis skills	BI	C#	T-SQL	Data Warehouse	Power BI
Languages	BI Tools	Team Foundation Server	DB Query Tool	Technology	SQL		
Microsoft SQL Server	Cloud	MS SQL Server 2016	Data model design	Statistics			
Data analytics	SSIS	Web development	Teaching	Early childhood education
