PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with **5+ years** of experience in **data visualization**, **SQL analytics**, and **automation**. Skilled in **Python**, **SQL**, **Tableau**, and **AWS**, with expertise in optimizing operations, building dashboards, and automating reports. Experienced in **data extraction**, **ETL pipelines**, and **financial claims** analysis. Passionate about turning complex data into actionable insights to improve decision-making, operational efficiency, and reporting accuracy.

WORK EXPERIENCE

Jr. Data Analyst, VIVIO Health, Inc., Hayward, CA

Sep 2024 - Mar 2025

- Automated data extraction and report generation using MySQL, Python, RunDeck, and Cursor AI, **reducing manual effort by 40%** and **ensuring 100% accuracy** in financial reports.
- Developed and maintained KPIs, claims reports, high-cost drug analyses, and quarterly spend reports, providing actionable insights that enabled executives to optimize resource allocation, identify inefficiencies, and **reduce costs by 15%**.
- Designed **Amazon QuickSight dashboards** to analyze **drug fill rejections**, leading to a **20% reduction in approval delays** and increased patient satisfaction.
- Developed audit scripts for data quality checks, **reducing discrepancies by 30%** and improving financial and claims reporting accuracy.
- Implemented and managed a data pipeline to send customized drug lists (e.g., HIV, Pharmacy, GLP-1, Medical) to clients, and developed SQL queries to analyze month-over-month drug list changes.

Research Data Analyst, San Jose State University, San Jose, CA

Feb 2024 - Sep 2024

- Extracted key-value pairs from historical forms (images and PDFs) using **HuggingFace** (LayoutLMv3) and **PyPDF**, and stored them in S3.
- Loaded key-value pairs from S3 into **AWS Glue** and used **PySpark** to perform ETL tasks, including pre-processing and transformation.
- Stored processed data in **AWS Redshift** for downstream analysis and visualization in Tableau.
- Created **Tableau dashboards** to analyze various aspects of the dataset, such as **demographics**, **claim frequency**, and **approval rates**.

Data Analyst, Optum Inc. (UnitedHealth Group), Hyderabad, India

May 2019 - Dec 2021

- Worked with product teams to define KPIs for evaluating patient claim processing efficiency and cost management.
- Automated ETL workflows (Airflow, S3, MongoDB, SQL Server), cutting **data ingestion time by 40%** for quicker analytics.
- Built Tableau dashboards from **AWS Redshift**, visualizing cost trends & claim approval rates, leading to **5% operational cost savings**.
- Conducted **A/B testing** on feature releases, providing data-driven insights that **increased product adoption by 10%**.

Member Technical, Automatic Data Processing (ADP), Hyderabad, India

Sep 2016 - May 2019

- Collaborated with business and operations teams to **define KPIs** and measure business objectives, while performing comprehensive **EDA on HCM and payroll datasets** using SQL (MySQL) for ETL processes.
- Used SQL and Python (Pandas, SciPy, Statsmodels) for **data cleaning**, **advanced analysis**, and **statistical modeling**, ensuring data quality and generating actionable insights.
- Designed **30+ dashboards and reports** using **Tableau**, Excel, Matplotlib, and Seaborn, and developed **custom Google Analytics dashboards** for real-time tracking of key metrics tailored to business needs.

EDUCATION

- Master of Science in Data Analytics, San Jose State University Jan 2022 - Dec 2023
- Bachelor of Technology, Computer Science, Biju Patnaik University of Technology Aug 2012 - May 2016

TECHNICAL SKILLS

- Programming:** Python, Java, R, JavaScript
- Databases:** MySQL, SQL Server, NoSQL (DynamoDB)
- Visualization Tools:** Tableau, PowerBI, Google Analytics, Matplotlib, Seaborn, Plotly, MS Excel, Amazon QuickSight
- Analytical Skills:** Data Visualization, Exploratory Analysis, Data Mining, Statistical Modeling, A/B Testing
- Others Tools:** RunDeck, Cursor AI, Apache Airflow, Google Colab, Git, Jira, Rally
- Cloud:** AWS (S3, Redshift, Glue, Sagemaker)
- Machine Learning:** SKlearn, HuggingFace, Keras, TensorFlow
