Summary

Process-driven Business Analyst with 4+ years of experience in system optimization and technical operations. Expert in Requirements Gathering and Business Process Modeling, with a proven track record of managing complex SaaS deployments and delivering precise Functional Specifications. Skilled in bridging the gap between business needs and technical execution to drive successful system configurations and operational excellence.

Work Experience

IS Business Analyst

August 2025 – Present

BIOMÉRIEUX – IS PRODUCTS – US MFG. THIRD-PARTY APPLICATIONS, ST. LOUIS, MO

- Design and manage ServiceNow ticketing workflows to support complex SaaS operations, utilizing Business Process Modeling to enhance process efficiency and system landscape management.
- Collaborate with cross-functional teams to assess resource allocation and project timelines, delivering interactive dashboards for data-driven work optimization.
- Perform System Configuration for third-party Manufacturing Execution System (SaaS) applications, ensuring high system reliability and seamless enterprise integration.
- Capture and translate global customer business needs into structured manufacturing recipes and Functional Specifications within MES software.
- Assess and resolve software incidents through root cause analysis while collaborating with technical teams to maintain system performance and user satisfaction.
- Execute SQL queries to extract and analyze manufacturing data, interpreting JSON-structured outputs to support reporting and Process Improvement initiatives.

Operations Technician

February 2023 – July 2024

AMEREN – DIGITAL AUDIO/VISUAL AND ASSET MANAGEMENT, ST. LOUIS, MO

- Led OS migration and Software Deployment for 300+ Surface Hubs, providing post-deployment support through departmental training and technical documentation.
- Assessed corporate digital signage infrastructure and implemented Change Management strategies to streamline imaging and deployment processes.
- Improved asset tracking accuracy to 96% by integrating ServiceNow modules and conducting Acceptance Testing on new asset-tracking features.
- Managed asset lifecycle procedures for Audio/Visual systems and reduced system downtime by designing new ServiceNow ticket intake workflows based on business requirements.

Operations Specialist

September 2022 – February 2023

AMEREN – IT ASSET MANAGEMENT, ST. LOUIS, MO

- Captured technical requirements for onboarding 1000+ employees, ensuring smooth transitions of company assets and system access.
- Performed 200+ asset lifecycle procedures and optimized ServiceNow workflows to drive Process Improvement in asset management integration.
- Maintained 99% asset inventory accuracy and authored Functional Specifications for training documentation to reduce team onboarding time.
- Delivered advice on bulk IT asset procurement by assessing business needs and budget constraints to improve cost efficiency.

Digital Co-Op/Intern

April 2021 – August 2022

AMEREN – IT ASSET MANAGEMENT, ST. LOUIS, MO

- Resolved 600+ ServiceNow tickets by consolidating IT asset databases, improving reporting accuracy and reducing project backlog.
- Collaborated with technical teams to image 500+ IT assets, contributing to on-time employee onboarding and Software Deployment milestones.
- Conducted weekly inventory audits and utilized User Stories to refine database asset tracking accuracy and data integrity.

Education

B.S in Computer Science & Finance Minor

December 2025

UNIVERSITY OF MISSOURI SAINT LOUIS, ST. LOUIS, MISSOURI
